overview of the curriculum field and a set of concepts for analyzing the field. To accomplish these related goals, the discussion that follows focuses on these outcomes: defining the concept of curriculum, examining the several types of curricula, describing the contrasting nature of curriculum components, and analyzing the hidden curriculum ...

CHAPTER 1 The Nature of Curriculum

- Schools have considerable freedom over how they deliver the curriculum. There are no minimum hours required for any national curriculum or other subject. 1.1 Maintained school curriculum requirements All maintained schools in England must offer the statutory curriculum as set out in Section 80 of the

The school curriculum in England

In January 2017, Her Majesty's Chief Inspector (HMCI) commissioned an Ofsted-wide review of the curriculum. Its aim was to provide fresh insight into leaders' curriculum intentions, how these are implemented and the impact on outcomes for pupils. This report shines a spotlight on the Reception Year

Although Chinese societies have generally become striking as the classic over-achievers in international measures of academic performance, there has been no specialised publication exploring early childhood curriculum in Chinese contexts. Through this book, readers will learn more about how the Chinese context and culture collide with educators' beliefs about the right activities for children and educators in early childhood settings. This book will be the first one of its kind to focus on early childhood curriculum in Chinese societies – from social context and culture to reforms and practices, and finally to the lessons that researchers, policymakers and practitioners could learn, as well as future directions. Is play valued? Are young children schooled earlier in Chinese societies? How do Chinese children learn in kindergartens? What is valued by Chinese educators when they implement early childhood curricula? How do Chinese teachers deliver early childhood curricula for their young children? Why were Chinese early childhood curricula implemented in these ways? Answers to these questions and more will be provided in this pioneering book.

Presents a multifaceted model of understanding, which is based on the premise that people can demonstrate understanding in a variety of ways.

School systems in the Visegrad Four countries have gone through significant change since the political upheavals of 1989. The book describes developments in curriculum and curriculum policy over the last three decades and considers the possible impact and perspectives of current changes. It explores the nature of curriculum reform, addresses the challenge of its implementation and highlights the reform as a means by which school quality can be improved and as a 'provider' of aims and contents of school education. Hopefully, the book will contribute to the discussion of options for further curriculum development and curriculum policy in the Visegrad Four and other countries with a similar educational background.

This book brings together voices and perspectives from across the world and draws in a new generation of curriculum scholars to provide fresh insight into the contemporary field. By opening up Curriculum Studies with contributions from twelve countries—including every continent—the book outlines and exemplifies the challenges and opportunities for transnational curriculum inquiry. While curriculum remains largely shaped and enabled nationally, global policy borrowing and scholarly exchange continue to influence local practice. Contributors explore major shared debates and future implications through four key sections: Decolonising the Curriculum; Knowledge Questions and Curriculum Dilemmas; Nation, History, Curriculum; and Curriculum Challenges for the Future.

In the movement toward standards-based education, an important question stands out: How will this reform affect the 10% of school-aged children who have disabilities and thus qualify for special education? In *Educating One and All*, an expert committee addresses how to reconcile common learning for all students with individualized education for "one"—the unique student. The book makes recommendations to states and communities that have adopted standards-based reform and that seek policies and practices to make reform consistent with the requirements of special education. The committee explores the ideas, implementation issues, and legislative initiatives behind the tradition of special education for people with disabilities. It investigates the policy and practice implications of the current reform movement toward high educational standards for all students. *Educating One and All* examines the curricula and expected outcomes of standards-based education and the educational experience of students with disabilities—and identifies points of alignment between the two areas. The volume documents the diverse population of students with disabilities and their school experiences. Because approaches to assessment and accountability are key to standards-based reforms, the committee analyzes how assessment systems currently address students with disabilities, including testing accommodations. The book addresses legal and resource implications, as well as parental participation in children's education.

This book constitutes the refereed proceedings of the 13th International Conference on Blended Learning, ICBL 2020, held in Bangkok, in August 2020. The 33 papers presented were carefully reviewed and selected from 70 submissions. The conference theme of ICBL 2020 is Blended Learning : Education in a Smart Learning Environment. The papers are organized in topical sections named: Blended Learning, Hybrid Learning, Online Learning, Enriched and Smart Learning, Learning Management System and Content and Instructional Design.

"This is a detailed yet practical guide to planning, developing, and evaluating nursing curricula and educational programs. It provides a comprehensive and

critical perspective on the totality of variables impacting curricular decisions... This book provides readers with a comprehensive overview of curriculum development, redesign, and evaluation processes...92 - 4 Stars" --Doody's Book Reviews Reorganized and updated to deliver practical guidelines for evidence-based curricular change and development, the fourth edition of this classic text highlights current research in nursing education as a springboard for graduate students and faculty in their quest for research projects, theses, dissertations, and scholarly activities. It also focuses on the specific sciences of nursing education and program evaluation as they pertain to nursing educators. New chapters address the role of faculty regarding curriculum development and approval processes in changing educational environments; course development strategies for applying learning theories, educational taxonomies, and team-building; needs assessment and the frame factors model; ADN and BSN and pathways to higher degrees; and planning for doctoral education. The fourth edition continues to provide the detailed knowledge and practical applications necessary for new and experienced faculty to participate in essential components of the academic role—instruction, curriculum, and evaluation. At its core, the text discusses the importance of needs assessment and evidence as a basis for revising or developing new programs and highlights requisite resources and political support. With a focus on interdisciplinary collaboration, the book addresses the growth of simulation, how to help new faculty transition into the academic role, and use of curriculum in both practice and academic settings. Additionally, the book describes the history and evolution of current nursing curricula and presents the theories, concepts, and tools necessary for curriculum development. Chapters include objectives, discussion points, learning activities, references, and a glossary. New to the Fourth Edition: Reorganized and updated to reflect recent evidence-based curricular changes and developments Highlights current research New chapter: Implementation of Curriculum – Course Development Strategies for the Application of Learning Theories, Educational Taxonomies, and Instruction Team-Building New chapter on Planning for Undergraduate Programs New content on Needs Assessment and the Frame Factors Model New content on Planning for Doctoral Education in Nursing New content on curriculum evaluation, financial support, budget management, and use of evidence Key Features: Supports new faculty as they transition to academe Addresses the need for preparing more faculty educators as defined by IOM report, the ACA, and the Consensus Model Describes the scope of academic curriculum models at every practice and academic level Threads the concept of interdisciplinary collaboration in education throughout Serves as a CNE Certification Review
