This book deepens the understanding of people through smartphone data obtained via mobile sensing and applies psychological insights for social networking applications. The author first introduces TYDR, an application for researching smartphone data and user personality. A novel, structured privacy model for mobile sensing applications is developed and the obtained empirical results help researchers gauge what data they can expect users to share in daily-

life studies. The new research findings, the concept of mobile sensing, and psychological insights about the formation and structure of real-life social networks are integrated into the field of social networking. Finally, for this novel integration, the author presents concepts, decentralized software architectures, and fully realized prototypes that recommend new contacts, media, and locations to individual users and groups of users. Provides a psychoinformatical research framework for mobile sensing and user personality; Includes an app, a privacy model, example studies, and empirical insights about study participants' willingness to share data; Introduces

decentralized social networking concepts and applications based on psychological research results.

This two-volume set, LNCS 11317 and 12318, constitutes the thoroughly refereed proceedings of the 4th International Joint Conference, APWeb-WAIM 2020, held in Tianjin, China, in September 2020. Due to the COVID-19 pandemic the conference was organized as a fully online conference. The 42 full papers presented together with 17 short papers, and 6 demonstration papers were carefully reviewed and selected from 180 submissions. The papers are organized around the following topics: Big Data Analytics; Graph Data and Social

health and lifestyle. It also demonstrates how mobile technologies can be used for educating frontline health workers as well as the communities they serve. This book offers many examples of such programs and provides essential guidance on:

- Understanding precisely what knowledge must be imparted to the communities and how.
- Why mobile technology is the new and most important platform for delivering educational content.
- How educational programs can be designed for developing countries in a sustainable way.

Do you believe in destiny? Can you ever imagine a girl who comes in your dream could come in real? "Ishana" is a love story in

Online Library App Xender File Transfer And Share

Prajwal's life which changed his life forever. You will get to know about, how all Prajwal traveled in his life to find his Dreamgirl and How all destiny played in his life. "Ishana" is a story that will teach you, how much you need to believe in a dream to make it real. Prajwal is not just a person, he could be anyone of you! Who dreams to achieve something bigger, which is always too far to reach. If you succeed in your dreams or not! but it's your decision that makes you happy in the end and ever after.

Technological advances have helped to enhance disaster resilience through better risk reduction, response, mitigation, rehabilitation and reconstruction.

Online Library App Xender File Transfer And Share

In former times, it was local and traditional knowledge that was mainly relied upon for disaster risk reduction. Much of this local knowledge is still valid in today's world, even though possibly in different forms and contexts, and local knowledge remains a shared part of life within the communities. In contrast, with the advent of science and technology, scientists and engineers have become owners of advanced technologies, which have contributed significantly to reducing disaster risks across the globe. This book analyses emerging technologies and their effects in enhancing disaster resilience. It also evaluates the gaps, challenges, capacities required and the way forward for

Online Library App Xender File Transfer And Share

future disaster management. A wide variety of technologies are addressed, focusing specifically on new technologies such as cyber physical systems, geotechnology, drone, and virtual reality (VR)/ augmented reality (AR). Other sets of emerging advanced technologies including an early warning system and a decision support system are also reported on. Moreover, the book provides a variety of discussions regarding information management, communication, and community resilience at the time of a disaster. This book's coverage of different aspects of new technologies makes it a valuable resource for students, researchers, academics, policymakers, and development
