While a surgeon many decades agotreated diseases from headtotoe, this concept has evolved, and today some degree of specialization is the rule worldwide. In many countries various boards for sub-specializations are designed, and after a broad training in general surgery, many young surgeons move on further into a specific field. Knowledge of anatomy and precise surgical technique remain the foundation of high quality surgery. A knowledgeable surgeon, equipped with excellent theoretic and clinical skills, will only be accomplished when he or she masters the operative techniques of the practice of surgery. The legacy of an academic surgeon or a surgical teacher relies in great part on the transmission of his or her surgical abilities. Significant influence on the development in esophageal surgery arises from the surgical understanding of the anatomical and functional structures of the esophagus as well as the ongoing developments in the multidisciplinary management in this challenging field of surgery. In bringing forth this atlas, we were motivated by the desire to create a comprehensive and educational atlas on esophageal diseases, emphasizing all details of pathophysiologies, diagnostic strategies, pre- and postoperative management, and operative techniques covering minimally invasive and open procedures ranging from straightforward to more complex procedures.

It is essential to know all of the intricate lymph pathways when performing surgery for esophageal cancer in order to determine the extent of lymph node metastasis. Professor Sato has undertaken, at the request of the TNM Research Committee of the International Society for Diseases of the Esophagus, to map out and classify the lymph nodes of the mediastinum and neck. The beautiful artwork in the Color Atlas of Surgical Anatomy for Esophageal Cancer edited by Professor Sato gives an excellent understanding of the lymph node pathways and their importance in surgical treatment. Minute dissections which represent real life situations, not just the superficial pathways, show the precise location and topographical arrangement of the lymphatics. Full-color schematics are given with the actual dissection illustrations and photographs. The atlas clearly presents the classification of four significant pathways and their communication, the relationship of these pathways en route to the venous angles and the definition and assessment of the most critical nodes. Thoracic surgeons especially will benefit from the excellent illustrations of surgical techniques and the methods for recording the dissected lymph nodes which are presented by Professor Kakegawa. Leading experts fighting esophageal cancer with surgical treatment can use the classification in this outstanding atlas for many years to come as a standard for international comparison. The careful dissection of the lymph nodes may be the best way to improve survival rates after surgery for cancer of the thoracic esophagus.

Esophageal cancer remains both a life-threatening disease and an everyday challenge for both patients and surgeons. Controversies regarding its management are prevalent, creating confusion and uncertainties. Preoperative mortality and morbidity, limited overall and disease-free survival, and dismal prognosis make decision making regarding the choice of management difficult. Prof. Puntambekar is an enthusiastic surgeon, full of energy and inspiration. This young colleague offers contemporary possibilities for management of esophageal carcinoma. Prof. Cuesta is an experienced surgeon working in Europe. These two authors have compiled their work in this atlas and enrich the reader with experience encompassing two different continents. This book is an update of novel surgical techniques of combined thoracoscopic and laparoscopic approach in minimally invasive management of esophageal carcinoma. Prof. Puntambekar's outstanding experience and expertise in this field is fully illustrated in this book in a step-by-step description of the operative procedures. This book should be regarded as a landmark for the surgical management of esophageal carcinoma. The book is distinctive and the technical steps are original, reflecting a deep knowledge of the regional anatomy and a unique ability of visual and operative orientation.

This Atlas provides an easy-to-follow operational guide to laparoscopic techniques. It features a wealth of photos to illustrate esophageal carcinoma surgery. Through step-by-step anatomical photographs, it clearly depicts the Ivor-Lewis operative and Ivor-Lewis-Mckeown operative techniques. Using a consistent format, it addresses the clinical anatomy, pre-operative considerations, operative steps, post-operative care, and pearls and pitfalls to make it easy-to-read. The authors emphasize the similarities of the principles and steps between open and laparoscopic surgery, which significantly simplifies the transition from one practice to the other. This Atlas also includes a description of anesthesia techniques, a guide to the use of staplers in laparoscopic surgery, and a comparison of the energy sources available for laparoscopic surgery, while also outlining future developments, e.g. the increasing prevalence of robotic surgery for these procedures. The Atlas offers an essential guide for practitioners and trainees, laparoscopic and thoracoscopic surgeons, and experienced esophageal surgeons who are preparing to change to minimal invasive techniques for the management of esophageal carcinoma. This atlas covers in detail the technical aspects of all important procedures of the upper abdomen (esophagus, duodenum, stomach, liver, biliary system, pancreas, portal hypertension and spleen) including general, oncologic and transplantation surgery. Each procedure is associated with a short comment regarding indications of the various operative steps. Approximately 900 illustrations have been drawn by the same team of three artists of notable experience. The liver section follows the internationally accepted terminology of the Brisbane 2000 conference of the IHPBA. In this atlas experts of upper abdominal surgery share their experience step-by-step.
