Planning Educational Facilities provides a detailed discussion of all of the processes involved in planning a school building. From a discussion on how to organize the local staff to the final evaluation of the building, the separate processes are described in detail. The responsibility of the educator and school board are discussed in such a way that individuals on the local level should feel confident in the knowledge of the planning process gained from this book. The relationship between the school board and the architect are described in detail and an example of an architect's contract is given. Other examples of contracts are provided. The process of contracting with a contractor is discussed in detail. In addition, some alternative methods of contracting for such services are provided. A section on green schools is included because this is an important way to construct buildings. A chapter on problem-based activities is provided, which should give the reader an opportunity to experience some of the problems educators actually face in this planning process.

The orderly Sweet-Williams are dismayed at their son's fondness for the messy pastime of gardening.

Contains a collection of specific classroom strategies & suggestions for teaching writing to elementary school students according to an eight-stage process. Specific techniques for teaching each stage of the writing process & descriptions of proven approaches for using these techniques are also included. "A wonderful resource, a labor of love from a large & talented group of educators." Had its beginnings in the California Writing Project at the Univ. of California, Irvine. Best Seller! Illustrated.

An understanding of logic is essential to computer science. This book provides a highly accessible account of the logical basis required for reasoning about computer programs and applying logic in fields like artificial intelligence. The text contains extended examples, algorithms, and programs written in Standard ML and Prolog. No prior knowledge of either language is required. The book contains a clear account of classical first-order logic, one of the basic tools for program verification, as well as an introductory survey of modal and temporal logics and possible world semantics. An introduction to intuitionistic logic as a basis for an important style of program specification is also featured in the book.

Anaerobic Reactors is the fourth volume in the Biological Wastewater Treatment series. The fundamentals of anaerobic treatment are presented in detail, including its applicability, microbiology, biochemistry and main reactor configurations. Two reactor types are analysed in more detail, namely anaerobic filters and especially UASB (upflow anaerobic sludge blanket) reactors. Particular attention is also devoted to the post-treatment of the effluents from the anaerobic reactors. The book presents in a clear and didactic way the main concepts, working principles, expected removal efficiencies, design criteria, design examples, construction aspects, and operational guidelines for anaerobic reactors. The Biological Wastewater Treatment series is based on the book Biological Wastewater Treatment in Warm Climate Regions and on a highly acclaimed set of best selling textbooks. This international version is comprised by six textbooks giving a state-of-the-art presentation of the science and technology of biological wastewater treatment. Other books in the Biological Wastewater Treatment series: Volume 1: Wastewater characteristics, treatment and disposal Volume 2: Basic principles of wastewater treatment Volume 3: Waste stabilisation ponds Volume 5: Activated sludge and aerobic biofilm reactors Volume 6: Sludge treatment and disposal

When the fishing vessel La Conte sinks suddenly at night in one-hundred-mile-per-hour winds and record ninety-foot seas during a savage storm in January 1998, her five crewmen are left to drift without a life raft in the freezing Alaskan waters and survive as best they can. One hundred fifty miles away, in Sitka, Alaska, an H-60 Jayhawk helicopter lifts off from America's most remote Coast Guard base in the hopes of tracking down an anonymous Mayday signal. A fisherman's worst nightmare has become a Coast Guard crew's desperate mission. As the crew of the La Conte begin to die one by one, those sworn to watch over them risk everything to pull off the rescue of

the century. Spike Walker's memoir of his years as a deckhand in Alaska, *Working on the Edge*, was hailed by James A. Michner as "masterful . . . will become the definitive account of this perilous trade, an addition to the literature of the sea." In *Coming Back Alive*, Walker has crafted his most devastating book to date. Meticulously researched through hundreds of hours of taped interviews with the survivors, this is the true account of the La Conte's final voyage and the relationship between Alaskan fishermen and the search and rescue crews who risk their lives to save them.

This book provides clear guidance on how to manage a wide range of side effects frequently encountered when treating patients with radiation therapy. For each potential side effect, incidence, mechanism, symptoms, and grading are carefully described. All aspects of management are addressed, drawing on the latest available evidence and highlighting key details of importance in clinical routine. The introduction of new radiation therapy techniques such as 3D conformal radiation therapy, intensity-modulated radiation therapy, and image-guided radiation therapy has reduced normal tissue doses and, accordingly, treatment complications. Nevertheless, a significant percentage of patients still experience acute side effects, in part because the threshold doses for these toxicities are typically lower than those for late effects. Acute toxicities may lead to interruption of treatment and be associated with an increase in late damage. A swift and effective response is therefore essential. This book will enable the reader to provide effective care for each side effect, thereby improving patient compliance with treatment and treatment outcomes.

INDIEFAB Book of the Year Awards -- 2014 GOLD Winner for Best Sports Book The ultimate do-it-yourself guide for the outdoors enthusiast, completely updated for today's outdoorsman and now in full color. This latest (fifth) edition of the award-winning *Complete Outdoors Encyclopedia* will again prove to be the most effective outdoor skills instruction book ever published. This monumental guide to the outdoors is produced for the first time in full color, featuring more than 1,300 photographs and 1,000 diagrams and illustrations. Totally revised and updated, this indispensable resource offers in-depth coverage of hunting, shooting, fishing, camping, boating, survival, first aid, bowhunting, and species profiles of game animals, birds, fish, and sporting dogs. This book is a must-have reference guide for both novice and experienced sportsmen as well as any person planning to learn outdoor skills. To broaden the scope of this established reference work, author Vin T. Sparano has compiled brand-new sections on wilderness survival, all-terrain vehicles, and boating. He has included new information on GPS and increased focus on specialty sections such as flyfishing, sporting clays, backpacking, nutrition, and first-aid breakthroughs for outdoors emergencies. *Complete Outdoors Encyclopedia* clearly explains and illustrates the latest technologies and trends in the outdoors.
