Digital forensics and multimedia forensics are rapidly growing disciplines whereby electronic information is extracted and interpreted for use in a court of law. These two fields are finding increasing importance in law enforcement and the investigation of cybercrime as the ubiquity of personal computing and the internet becomes ever-more apparent. Digital forensics involves investigating computer systems and digital artefacts in general, while multimedia forensics is a sub-topic of digital

efficiency. The book contains 38 photographs, at times with both whimsy and deeper thought, intended for contemplation and the pleasure of looking. There are also layers of association and suggestion. An introductory essay considers how much more the motor car is than its mere material self – as a driving force in twentieth century western development, as a work of art, as a joy to drive, as a symbol, as an enabler and even in relation to spiritual understanding. The cars are above all in use, or have been, because they are more meaningful and interesting than in studio conditions or in museums. This book is in part a plea to slow down and pay more attention to our surroundings, a natural role for photography to play. These photographs are primarily a paean of

praise, sometimes with wit, for the beauty of the motor car in the landscape. Cars in the Landscape is for both those who love cars and those who appreciate beautiful photographs. You may just want to buy an old car and start travelling around Europe...
