Cardiac Magnetic Resonance (CMR) is a rapidly evolving imaging technology and is now increasingly utilized in patient care. Its advantages are noninvasiveness, superb image resolutions, and body tissue characterization. CMR is now an essential part of both cardiology and radiology training and has become part of the examination for Board certification. This book provides a condensed but comprehensive and reader friendly educational tool for cardiology fellows and radiology residents. It contains multiple choice questions similar to board examinations with concise comment and explanation about the correct answer.

100 Questions and Answers About Heart Attack and Related Medical Problems by eminent cardiologist Edward K. the wards • Simulates the consultation process: consult question → data collection → synthesis of data → solution • NEW to this edition: Guidelines for atrial fibrillation, hypertension, Lipids, Preoperative Screening, congestive heart failure, valvular heart disease, peripheral arterial disease, and more You will find Cardiology Clinical Questions to be the single-best resource for quickly translating the most current knowledge into practical, diagnostic real-time solutions.

This user-friendly review question book is geared specifically to candidates taking the Cardiovascular Boards and the Cardiovascular section of the Internal Medicine Boards, whether for initial certification or for recertification. The book contains over 700 questions with answers, focusing on the specific areas tested. Content areas are covered in the same proportion as on the actual exam to ensure highly targeted, high-yield preparation. This edition's questions are based on patient-oriented scenarios to mimic the Boards. The electrophysiology chapters have been completely revised and include more tracings. Sections on heart failure, coronary artery disease, and STEMI treatment have been significantly revised to reflect current American Heart Association-American College of Cardiology guidelines.
