Acclaimed biographer Peter Ackroyd vibrantly resurrects the legendary epic of Camelot in this modern adaptation. The names of Arthur, Merlin, Lancelot, Guinevere, Galahad, the sword of Excalibur, and the court of Camelot are as recognizable as any from the world of myth. Although many versions exist of the stories of King Arthur and the Knights of the Round Table, Le Morte d'Arthur by Sir Thomas Malory endures as the most moving and richly inventive. In this abridged retelling the inimitable Peter Ackroyd transforms Malory's fifteenth-century work into a dramatic modern story, vividly bringing to life a world of courage and chivalry, magic, and majesty. The golden age of Camelot, the perilous search for the Holy Grail, the love of Guinevere and Lancelot, and the treachery of Arthur's son Mordred are all rendered into contemporary prose with Ackroyd's characteristic charm and panache. Just as he did with his fresh new version of Chaucer's The Canterbury Tales, Ackroyd now brings one of the cornerstones of English literature to a whole new audience.

Maternal-Child Health is one of the greatest challenges the world has to cope with today. Every year, thousands of women, newborns and children die unnecessarily, particularly in resource-poor settings. There is a great disparity caused by food insecurity and hunger, environmental health risks, sanitation challenges, cultural barriers and non-accessibility to diagnosis and treatment. "Maternal-Child Health: Interdisciplinary Aspects within the Perspective of Global Health" addresses these issues. The contributions of this book are based on the ONE HEALTH concept by focusing on infectious and non-communicable diseases and to present interdisciplinary views from more than 60 authors who come from 14 countries. The aim is to shape our understanding on Maternal-Child Health Solutions by looking at > agricultural and environmental > economic, social and theological > biomedical and nutritional > clinical human and veterinary as well as > epidemiology and > public health expertise. The Göttingen International Health Network is corresponding to a variety of different geographic regions and programs to improve global health perspective and health of the most vulnerable: mothers and their children.
