Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Techno-Economic Challenges of Green Ammonia as an Energy Vector presents the fundamentals, techno-economic challenges, applications, and state-of-the-art research in using green ammonia as a route toward the hydrogen economy. This book presents practical implications and case studies of a great variety of methods to recover stored energy from ammonia and use it for power, along with transport and heating applications, including its production, storage, transportation, regulations, public perception, and safety aspects. As a unique reference in this field, this book can be used both as a handbook by researchers and a source of background knowledge by graduate students developing technologies in the fields of hydrogen economy, hydrogen energy, and energy storage. Includes glossaries, case studies, practical concepts, and legal, public perception, and policy viewpoints that allow for thorough, practical understanding of the use of ammonia as energy carrier Presents its content in a modular structure that can be used in sequence, as a handbook, in individual parts or as a field reference Explores the use of ammonia, both as a medium for hydrogen storage and an energy vector unto itself

Best Practices for Filing Chapter 13 provides an authoritative, insiders perspective on best practices for representing clients during a Chapter 13 case. Featuring experienced consumer bankruptcy lawyers, this book guides the reader through the issues and challenges faced by attorneys working with Chapter 13 debtors during this uncertain economic climate. From the initial client meeting to finalizing the Chapter 13 plan, these top lawyers examine the filing process step-by-step and analyze how to tailor a strategy to fit a clients unique situation and goals. These authors reveal proven advice for determining a debtors eligibility, understanding home loans, and negotiating with Chapter 13 trustees. Additionally, these leaders discuss the lasting effects of BAPCPA, the economic recession, and recent cases like Hamilton v. Lanning on debtors, attorneys, and the consumer bankruptcy practice as a whole. The different niches represented and the breadth of perspectives presented enable readers to get inside some of the great legal minds of today, as these experienced lawyers offer up their thoughts on the keys to success within this complex field.

To capitalise on the new international resolve epitomised by COP21 and the agreement on the universal Sustainable Development Goals (SDGs) requires a renewed effort to promote new policy thinking and new approaches to the great challenges ahead. Responding to new challenges means we have to ...

Best Practices for Filing Chapter 13 provides an authoritative, insiders perspective on best practices for representing clients during a Chapter 13 case. Featuring experienced consumer bankruptcy lawyers from across the country, this book guides the reader through the issues and challenges faced by attorneys working with Chapter 13 debtors during these times of ongoing economic uncertainty. From the initial client meeting to finalizing the Chapter 13 plan, these top lawyers examine each step of the filing process and describe their best practices for shaping an effective strategy that matches each clients unique situation and goals. These authors reveal proven advice for determining a debtors eligibility, halting foreclosure and repossession actions, and putting a stop to creditors harassing phone calls. Additionally, these leaders discuss the lingering effects of the BAPCPA-induced ambiguity in the Code, the frustratingly slow economic recovery, and such recent legislative actions as Home Affordable Modification Program (HAMP) and the Home Affordable Refinance Program (HARP). The different niches represented and the breadth of perspectives presented enable readers to get inside some of the great legal minds of today, as these experienced lawyers offer up their thoughts on the keys to success within this complex field.

Annotation Part 6: Financial Markets and the Macroeconomy. 19. Asset prices, consumption, and the business cycle (J.Y. Campbell). 20. Human behavior and the efficiency of the financial system (R.J. Shiller). 21. The financial accelerator in a quantitative business cycle framework (B. Bernanke, M. Gertler and S. Gilchrist). Part 7: Monetary and Fiscal Policy. 22. Political economics and macroeconomic policy (T. Persson, G. Tabellini). 23. Issues in the design of monetary policy rules (B.T. McCallum). 24. Inflation stabilization and BOP crises in developing countries (G.A. Calvo, C.A. Vegh). 25. Government debt (D.W. Elmendorf, N.G. Mankiw). 26. Optimal fiscal and monetary policy (V.V. Chari, P.J. Kehoe).

The processes and techniques of manufacturing have changed substantially over the decades and that evolution continues today. In order to examine the potential impacts of these changes, the Department of Commerce asked the NRC to design a workshop to focus on issues central to the changing nature of manufacturing. The workshop brought together a number of experts to present papers about and to discuss the current state of manufacturing in the United States and the challenges it faces. This report presents the results of that workshop. Key challenges that emerged from the workshop and that are discussed include understanding manufacturing trends; manufacturing globalization; information technology opportunities; maintaining innovation; strengthening small and medium-sized enterprises; workforce education; and rising infrastructure costs.

The last two decades have been a turbulent period for American higher education, with profound demographic shifts, gyrating salaries, and marked changes in the economy. While enrollments rose about 50% in that period, sharp increases in tuition and fees at colleges and universities provoke accusations of inefficiency, even outright institutional greed and irresponsibility. As the 1990s progress, surpluses in the academic labor supply may give way to shortages in many fields, but will there be enough new Ph.D.'s to go around? Drawing on the authors' experience as economists and educators, this book offers an accessible analysis of three crucial economic issues: the growth and composition of undergraduate enrollments, the supply of faculty in the academic labor market, and the cost of operating colleges and universities. The study provides valuable insights for administrators and scholars of education.

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

International migration and urbanization as economic processes can provide great opportunities to solve local and regional economic and social problems and lead to the leveling of global economic unfairness and multi-complexity. However, uncontrolled migration and urbanization can easily destroy market stability and create many new social and economic problems both in developed (due to migration) and developing (due to urbanization) countries. Migration and Urbanization: Local Solutions for Global Economic Challenges is a collection of innovative research that sets basic rules and patterns for state regulation of urbanization and international migration and for increasing the economic efficiency of developed and developing countries. Additionally, the book evaluates the economic impact of urbanization and international migration at the global, national, and regional levels. While highlighting topics including economic security, modern mechanisms, and migration policy, this book is ideally designed for government officials, economists, educators, policymakers, industry leaders, business managers, academicians, researchers, and students.
