The essential, up-to-date guide for helping children with language and listening problems Does your child have trouble getting the right words out, following directions, or being understood? In this revised new edition of Childhood Speech, Language, and Listening Problems, speech-language pathologist Patricia Hamaguchi—who has been helping children overcome problems like these for more than thirty years—answers your questions to help you determine what's best for your child. This newest edition: * Expands on speech and articulation issues affecting toddlers * Includes a new chapter on socially "quirky" children Explains how to get the right help for your child, including when to wait before seeking help, how to find the right specialist, and how the problem may affect your child academically, socially, and at home Covers major revisions in educational laws and programs and insurance coverage as well as current information on new interventions and cutting-edge research in the field Updates information on autism spectrum disorders, neurobiological disorders, and auditory processing disorders "Provides valuable information for parents of children with speech, language, and listening problems."—Sandra C. Holley, Ph.D., Former President, American Speech-Language-Hearing Association (on the Second Edition) More than 1.1 million children receive special education services each year to address speech and language problems, and many others struggle with language and listening to some degree. If your child is one of them, this book gives you the crucial and up-to-date guidance you need to help him or her both in school and at home.

In this exhilarating and often hilarious book, David Crystal examines why we devote so much time and energy to language games, how professionals make a career of them, and how young children instinctively take to them. Crystal makes a simple argument—that since playing with language is so natural, a natural way to learn language is to play with it—while he discusses puns, crosswords, lipograms, comic alphabets, rhymes, funny voices taken from dialect and popular culture, limericks, anagrams, scat singing, and much more.

Children with Specific Language Impairment covers all aspects of SLI, including its history, possible genetic and neurobiological origins, and clinical and educational practice.

Now in its second edition, *Speech and Language Therapy: the decision-making process when working with children* reveals how recent research and changes in health and education services have affected the decision-making process in the assessment and management of children with speech and language problems. With individual chapters written by experts in their field, this book: Illustrates how the decisions made by practitioners may vary within different work settings Shows how these decisions may need to be adapted when working with specific client groups Explores how such decisions are part of effective evidence-based practice Offers an overview of the skills required by the developing professional Provides insight into working as a newly qualified therapist in the current job market. Rigorously underpinned with current research and revised legislation, this is an important textbook for speech and language therapy students, potential students and specialist teachers in training. *Speech and Language Therapy: the decision-making process when working with children* will also be relevant to newly qualified therapists, therapists returning to the profession, specialist teachers and Special Educational Needs Coordinators.

Increasing numbers of children find it a challenge to stay focused on a task and follow even simple instructions in the classroom. *Teaching Children to Listen* outlines a whole-school approach to improving listening skills. It begins by looking at why listening skills are important and how to overcome barriers to achieving them, before pinpointing the behaviours that children need to learn in order to be a good listener. The book includes: The Listening Skills Rating Scale - a quick assessment, which will able you to rate children on each of the four rules of good listening. Advice on using these findings to inform individual education plans that focus on a specific area of difficulty. 40 activities, including games to target whole-class listening and exercises particularly suitable for the Early Years. Each activity sets out what equipment you need, tips for facilitating and ideas for differentiation. Perfect for children aged 3-11, all the games and ideas have been tried-and-tested, and have proved successful with children with a range of abilities, including those with special needs.

Coves 356 periodicals in psychology and education, offering information about where to submit papers for publication and which journals to read. With title, editor, and publisher indexes. ...concisely presented and useful data for the prospective author. --ARBA ...provides the reader with a revealing overview of modern psychology. --PSYCHOLOGICAL MEDICINE
