How does culture articulate, frame, organise and produce stories about social class and class difference? What do these stories tell us about contemporary models of success, failure, struggle and aspiration? How have class-based labels been revived or newly-minted to categorise the insiders and outsiders of the new 'age of austerity'? Drawing on examples from the 1980s to the present day this book investigates the changing landscape of class and reveals how it has become populated by a host of classed figures including Essex Man and Essex Girl, the 'squeezed middle', the 'sharp-elbowed middle class', the 'feral underclass', the 'white working class', the 'undeserving poor', 'selfish baby boomers' and others. Overall, the book argues that social class, although complicated and highly contested, remains a valid and fruitful route into understanding how contemporary British culture articulates social distinction and social difference and the significant costs and investments at stake for all involved.

Complex factors affect young children and their families in today 's increasingly diverse world characterized by globalization, the transnational movement of people, and neo-liberal government policies in western and industrialized countries. This book focuses on three of these factors—culture, language and learning—and how they affect children 's development and learning in the context of their communities, families and schools. Taking an ecological perspective, it challenges normative and hegemonic views of young children 's language, literacy and numeracy development and offers examples of demonstrated educational practices that acknowledge and build on the knowledge that children develop and learn in culturally specific ways in their homes and communities. The authors highlight issues and perspectives that are particular to Indigenous people who have been subjected to centuries of assimilationist and colonialist policies and

This Companion offers a comprehensive account of the influence of contemporary British Black and Asian writing in British culture. While there are a number of anthologies covering Black and Asian literature, there is no volume that comparatively addresses fiction, poetry, plays and performance, and provides critical accounts of the qualities and impact within one book. It charts the distinctive Black and Asian voices within the body of British writing and examines the creative and cultural impact that African, Caribbean and South Asian writers have had on British literature. It analyzes literary works from a broad range of genres, while also covering performance writing and non-fiction. It offers pertinent historical context throughout, and new critical perspectives on such key themes as multiculturalism and evolving cultural identities in contemporary British literature. This Companion explores race, politics, gender, sexuality, identity, amongst other key literary themes in Black and Asian British literature. It will serve as a key resource for scholars, graduates, teachers and students alike.

Studying British Cultures is a lively and provocative volume of essays which offers the ideal introduction to a contentious area. The contributors, who have been instrumental in establishing the discipline of British Cultural Studies, explore a wide range of critical debates on cultural identity and explode the myth that Britain is made up of a homogenous people. The first half of the book traces examines the theory and methodology of studying British cultures, in disciplines variously known as British Studies, Cultural Studies or British Cultural Studies. The second half of the book turns to key topics in those fields, looking in turn at developments in Scottish, Welsh and Irish Studies and the roles of Shakespeare and West Indian literature in the study of British cultures. In vivid and often entertaining essays, the authors demonstrate that 'culture' is a

The Oxford Handbook of Contemporary British and Irish Poetry offers thirty-eight chapters of ground breaking research that form a collaborative guide to the many groupings and movements, the locations and styles, as well as concerns (aesthetic, political, cultural and ethical) that have helped shape contemporary poetry in Britain and Ireland. The book's introduction offers an anthropological participant-observer approach to its variously conflicted subjects, while exploring the limits and openness of the contemporary as a shifting and never wholly knowable category. The five ensuing sections explore: a history of the period's poetic movements; its engagement with form, technique, and the other arts; its association with particular locations and places; its connection with, and difference from, poetry in other parts of the world; and its circling around such ethical issues as whether poetry can perform actions in the world, can atone, redress, or repair, and how its significance is inseparable from acts of evaluation in both poets and readers. Though the book is not structured to feature chapters on authors thought to be canonical, on the principle that contemporary writers are by definition not yet canonical, the volume contains commentary on many prominent poets, as well as finding space for its contributors' enthusiasms for numerous less familiar figures. It has been organized to be read from cover to cover as an ever deepening exploration of a complex field, to be read in one or more of its five thematically structured sections, or indeed to be read by picking out single chapters or discussions of poets that particularly interest its individual readers.

In *British Cultural Identities*, Mike Storry and Peter Childs assess the degree to which being British impinges on the identity of the many people who live in Britain. They analyze contemporary British identity through the various and changing ways in which people who live in the UK position themselves and are positioned by their culture today. Using examples from contemporary and popular culture, each chapter covers one of seven intersecting themes: place and environment education, work and leisure gender, sex and the family youth culture and style class and politics ethnicity and language religion and heritage. This new edition is fully updated to include Britain's relationship with the wider world, changes in university education and testing in schools, the trend towards electronic entertainment and social networking, the new impact of 'class', and the culture of political leaking.

*Contemporary African American and Black British Women Writers: Narrative, Race, Ethics* brings together British and American scholars to explore how, in texts by contemporary black women writers in the U. S. and Britain, formal narrative techniques express new understandings of race or stimulate ethical thinking about race in a reader. Taken together, the essays also demonstrate that black women writers from both sides of the Atlantic borrow formal structures and literary techniques from one another to describe the workings of structural racism in the daily lives of black subjects and to provoke readers to think anew about race. Narratology has only recently begun to use race as a category of narrative theory. This collection seeks both to show the ethical effects of narrative form on individual readers and to foster reconceptualizations of narrative theory that account for the workings of race within literature and culture.
