From one of our finest historians comes an outstanding exploration of the British monarchy from the retreat of the Romans up until the modern day. This compendium volume of two earlier books is fully revised and updated.

The monarchy is one of Britain's longest surviving institutions - as well as one of its most tumultuous and revered. In this masterful book, David Starkey looks at the monarchy as a whole, charting its magnificent history from Roman times, to the Wars of the Roses, the chaos of the Civil War, the fall of Charles I and Cromwell's emergence as Lord Protector - all the way up until the Victorian era when it came face-to-face with modernity. More than a collection of biographies of Britain's kings and queens, this is an in-depth examination of what the British monarchy has meant, what it means now and what it will continue to mean. Bringing to life a cast of colourful characters, Starkey's trademark energy and authority make him the perfect guide on this epic, accessible and compelling journey, as he offers us a vivid portrait of British culture, politics and nationhood.

In this text, HRH Prince Edward takes the reader on a journey through the history of London's royal connections and explains the architectural heritage of some of the world's most cherished royal landmarks.

This book provides a boldly original account of Middle English literature from the Norman Conquest to the beginning of the sixteenth century. It argues that these centuries are, in fundamental ways, the momentous period in our literary history, for they are the long moment in which the category of literature itself emerged as English writing began to insist, for the first time, that it floated free of any social reality or function. This book also charts the complex mechanisms by which English writing acquired this power in a series of linked close readings of both canonical and more obscure texts. It encloses those readings in five compelling accounts of much broader cultural areas, describing, in particular, the productive relationship of Middle English writing to medieval technology, insurgency, statecraft and cultural place, concluding with an in depth account of the particular arguments, emphases and techniques English writers used to claim a wholly new jurisdiction for their work. Both this history and its readings are everywhere informed by the most exciting developments in recent Middle English scholarship as well as literary and cultural theory. It serves as an introduction to all these areas as well as a contribution, in its own right, to each of them.

This book analyses the evolving relationship between the French monarchy and the French nobility in the early modern period. New interpretations of the absolutist state in France have challenged the orthodox vision of the interaction between the crown and elite society. By focusing on the struggle of central government to control the periphery, Bohanan links the literature on collaboration, patronage and taxation with research on the social origins and structure of provincial nobilities. Three provincial examples, Provence, Dauphine and Brittany, illustrate the ways in which elites organised and mobilised by vertical ties (ties of dependency based on patronage) were co-opted or subverted by the crown. The monarchy's success in raising more money from these pays d'etats depended on its ability to juggle a set of different strategies, each conceived according to the particularity of the social, political and institutional context of the province. Bohanan shows that the strategies and expedients employed by the crown varied from province to province; conceived on an individual basis, they bear the signs of ad hoc responses rather than a gradnoise plan to centralise.

This small book is on the impending and unprecedented worldwide glorious Golden Age of Peace that is about to break upon the whole world (and on how you can help make it arrive quickly). Authored by Daniel O'Connor, professor of Philosophy and Religion and a Doctoral student.

The Crown Agents Office played a crucial role in colonial development. Acting in the United Kingdom as the commercial and financial agent for the crown colonies, the Agency supplied all non-locally manufactured stores required by colonial governments, issued their London loans, managed their UK investments, and supervised the construction of their railways, harbours and other public works. In addition, the Office supervised the award of colonial land and mineral concessions, monitored the colonial banking and currency system, and performed a personnel role, paying colonial service salaries and pensions, recruiting technical officers, and arranging the transport of officers, troops and Indian indentured labour. In this important book, the first in-depth investigation of the Agency, David Sunderland examines each of these services in turn, determining in each case whether the Crown Agents' performance benefited their clients, the UK economy or themselves. His book is thus both an account of a remarkable and unique organisation and a fascinating examination of the "nuts and bolts" of nineteenth-century development. David Sunderland is Reader in Business History, Greenwich University.

By concentrating on the early years from Elizabeth's birth in 1533 to her accession in 1558, this book shows how her experiences of danger and adventure formed her remarkable character and shaped her opinions and beliefs. --from publisher description.
