6 Preface Sir John V. Dacie, MD, FRCPath, FRS 19122005 S. Mitchell Lewis, BSc, MD, DCP(London), FRCPath, FIBMS 1924 As a 61 year tribute, this edition is dedicated to Sir John Dacie and to Mitchell Lewis. Sir John was one of the pre-eminent British haematologists of the second half of the 20th century; he established haematology as a distinct discipline and his books on haemolytic anaemia have become modern clas- sics.

The 12th Edition of Dacie and Lewis Practical Haematology continues the tradition of excellence with thorough coverage of all of the techniques used in the investigation of patients with blood disorders, including the latest technologies as well as traditional manual methods of measurement. You'll find expert discussions of the principles of each test, possible causes of error, and the interpretation and clinical significance of the findings.

This manual describes all of the techniques used in the investigation of patients with blood diseases. It discusses the principles of each test, possible causes of error, and the interpretation and clinical significance of the results.

An updated, essential guide for the laboratory diagnosis of haemoglobin disorders This revised and updated third edition of Haemoglobinopathy Diagnosis offers a comprehensive review of the practical information needed for an understanding of the laboratory diagnosis of haemoglobin disorders. Written in a concise and approachable format, the book includes an overview of clinical and laboratory features of these disorders. The author focuses on the selection, performance, and interpretation of the tests that are offered by the majority of diagnostic laboratories. The book also explains when more specialist tests are required and explores what specialist referral centres will accomplish. The information on diagnosis is set in a clinical context. The third edition is written by a leading haematologist with a reputation for educational excellence. Designed as a practical resource, the book is filled with illustrative examples and helpful questions that can aid in the retention of the material presented. Additionally, the author includes information on the most recent advances in the field. This important text: • Contains a practical, highly illustrated, approach to the laboratory diagnosis of haemoglobin disorders • Includes “test-yourself” questions and provides an indispensable tool for learning and teaching • Presents new material on antenatal screening/prenatal diagnostic services • Offers myriad self-assessment case studies that are ideal for the trainee Written for trainees and residents in haematology, practicing haematologists, and laboratory

scientists, Haemoglobinopathy Diagnosis is an essential reference and learning tool that provides a clear basis for understanding the diagnosis of haemoglobin disorders.

The third edition of this popular pocket book, A Beginner's Guide to Blood Cells written by Professor Barbara Bain, provides a concise introduction to normal and abnormal blood cells and blood counts for trainees in haematology. Includes a brand new chapter on emergency morphology, designed to make the clinical significance and urgency of certain laboratory findings clear for biomedical scientists and to assist trainee haematologists in the recognition of major clinically important abnormalities Contains exceptional full colour images throughout Introduces important basic concepts of hematology, setting haematological findings in a clinical context Provides a fully updated self-assessment section An essential resource for trainee haematologists, biomedical scientists, and biomedical science and medical students

Comprehensive manual on haematology and clinical pathology, covering physiology, pathophysiology and clinical features of diseases.
