[What could be more timely than a book about kindness in today's divided and often hostile world? Kindness Tales is the long-awaited third book in a trilogy that includes Peace Tales and Earth Care from award-winning author and highly-respected folklorist, Margaret Read MacDonald. Margaret has curated a collection of her favorite stories that celebrate the timeless power of kindness to make the world a gentler, safer, and even more loving place. Kindness Tales contains more than forty folktales that illustrate the transformative power of kindness through leading, sharing and caring for one another through simple acts of kindness. These stories share a common theme of using thoughtful and sometimes generous acts of kindness to make the world better. These timeless tales from the world's great oral traditions are a delight to tell, read aloud with a group, or simply enjoy as a quiet reading experience. This book can also be used as a personal touchstone for thinking about and reflecting more deeply on the consequences of quiet acts of kindness. Stories from around the world are supplemented by generous reference notes, source information, and suggestions for further reading on the topic of kindness. These stories also teach the important role that fairness and personal responsibility contribute to our world. Due to Margaret's careful curation, these stories can be shared with groups of all ages. Some of these tales easily engage preschool and primary school-aged children, while other stories are more thought-provoking and more engaging for teenagers and adults. Margaret Read MacDonald is well known for her lively retellings of folktales. Drawing on her extensive background in folklore \(Ph.D. Indiana University Folklore Institute\) and her many travels throughout the world, MacDonald searches out unusual tales from the world's folk literature and oral traditions. She has a gift for retelling these stories so they appeal to children and adults alike. Margaret is a prolific writer and performer, having published over 55 books.](#)

[Offers over eighty short stories from around the globe, including Asia, Mexico, and eastern Europe.](#)

[A collection of short folktales from Mexico, Israel, Poland, and other places, demonstrating wisdom and justice.](#)

[A guide for parents, outdoor educators, play rangers, forest school leaders and teachers, 'I Love My World' is full of practical ideas which can be used to rekindle the naturally playful spirit and develop a deep connection with nature from an early age.](#)

[This all-new set of original science tales for children utilizes the power of storytelling to explore ecology's big ideas, providing extensive accompanying teacher support for maximum impact. • A dozen original tales that celebrate our relationship to the wild world through creative writing • More than 30 lesson plans for using the book's stories to the fullest, including separate plans for teaching each story to students at different levels • Dozens of original pen and ink drawings that illuminate the natural world • An annotated bibliography of books and websites for teachers and students, allowing further exploration of the ideas examined in the stories](#)

[Folktales in India have been told, heard, read and celebrated for many centuries. In breaking new ground, Indian folktales have been reread and examined in the light of the Mother Earth discourse as it manifests in the lifeworlds of women, nature and language. The book introduces ecofeminist criticism and situates it within an innovative folktales typology to connect women and environment through folklore. The book proposes an innovative paradigm inspired by the beehive to analyze motifs, relationships, concerns, worldviews and consciousness of indigenous women and men who live close to nature as well as other socially marginalized groups. In the current global context fraught with challenges for ecology and hopes for sustainable development, this book with its interdisciplinary approach will interest scholars and researchers of literature, environmental studies, gender studies and cultural anthropology.](#)

[Seven folktales from around the world express the belief that the Earth and all living things are sacred, and that it us up to each of us to care for our part of the planet. Includes an introduction and "eco-activity" for each tale.](#)
