This stunning illustrated children's book takes an innovative look at the circle of life, including animals, dinosaurs, stars, volcanoes, and even YOU. Everything has a beginning and an end, but what happens in between? Follow the migration of zebra across the vast plains, meet penguins guarding their eggs on the ice, and watch butterflies emerge from their cocoons. Shoot back in time 4.5 billion years to see how planet Earth was formed and then leap into the future to see what happens when stars die. Discover a new life cycle every time you turn the page. You'll take a closer look at the life cycles of environments, too. Discover how a river forms and changes over time. Find out how a tree grows and all of the other life cycles it supports within it. See the amazing sculptures the ocean waves carve out of cliffs. Dive beneath the surface to see how coral reefs form, and what causes them to die. Follow the life cycles of weather--from the water cycle to ice ages, to give you a better grasp of the climate situation we find ourselves in now. From the single-celled amoeba to how the Earth formed, the life cycles in this ebook have been carefully chosen to give you an amazing overview of the universe, and how everything is intricately linked. Filled with facts to amaze your friends, stunning photography, and beautifully detailed illustrations by Sam Falconer, Life Cycles gets to grips with the essence of life itself.

Every living thing goes through a life cycle, but each species has its own unique steps in the circle of life. This interactive book gives readers a hands-on learning experience through engaging experiments. They'll learn about life cycles and develop essential Next Generation Science Standards skills, such as asking testable questions, as they complete each project. The scientific method is made easy and accessible as readers complete a succession of boxes that prompt them to Ask, Test, Observe, and Measure. Helpful hints and materials lists ensure readers will complete projects with ease. Fun photographs, fast fact boxes, and "What's Next?" sections keep readers immersed in the flow of knowledge.

Soil! We walk on it, play in it, build with it, grow our food in it, and get antibiotics from it. But what exactly is soil? What makes it so important? Can we survive without it? In Explore Soil! With 25 Great Projects, young readers learn how vital soil is to our lives. It filters the water we drink and the air we breathe, and most of the food we eat either grows in soil or subsists on plants that grow there. Soil is a very important part of our daily diet! Activities such as exploring soil runoff, composting, and analyzing soil composition offer kids the chance to get their hands dirty while coming face to face with the study of soil. Kids learn concepts within the fields of life science and chemistry while discovering the dangers soil faces. Explore Soil offers fun, practical information about something kids already love: soil!

Each step of the life cycle for a variety of living creatures is covered in this book, guiding readers from the first stages of development for many plants and animals—including flowers, insects, fish, and mammals—through later phases and death. Also addressed are the different environments required for each step in the life cycle and the dangers these species may encounter throughout their lives. Critical thinking activities such as compare-and-contrast boxes help readers grasp general features of the life cycle and its peculiarities with each type of plant or animal.
