The Kitans established the Liao dynasty in northern China, which lasted for over two centuries (916-1125). In this survey the reader will find what is currently known about the Kitan language and scripts. The language was very likely distantly related to Mongolian, with two quite different scripts in use. A few generations after their state was defeated, almost all trace of the Kitan spoken and written languages disappeared, except a few words in Chinese texts. Over the past few decades, however, inscriptions from the tombs of the Liao emperors and the Kitan aristocracy have been at least partially deciphered, resulting in a significant increase of our knowledge of the Kitan lexicon, morphology and syntax.

Unlike traditional forms of Numerology, which add or reduce larger sets of numbers, Zeus Sensor Numerology correlates the 10 singular numbers of 0-9 to the Five Elements of Earth, Metal, Water, Wood, and Fire. Adding a Yin and Yang polarity to each element creates a matching ten-components. Users of our books and mobile apps can identify the innate energy that comprises our Body and Soul, as well as recognizing the natural, cyclical energy in our environment. Using the traditional Eastern theory of Bazi or Body Source Code, Zeus Sensor reveals the distinctive energy in the universe at our birth time and birthplace that comprises our configuration. This innate psychological and physiological energy can be manipulated through the use of numbers and colors to create personal balance and harmony. Using the traditional Eastern theory of timekeeping based on the 10 Heavenly Stems and 12 Earthly Branches, Zeus Sensor applies a singular number and color to each of the 60 components of a clock or calendar. This external energy is not ongoing and irregular; instead it is cyclical and predictable. Zeus Sensor Numerology removes all arithmetic, matching a singular number to the natural components of our birth time and place using Body Source Code. With the use of numbers and colors based on the Five Elements, we can easily manipulate our innate energy, as well as the energy in our environment to match our unique structure.

The term Fengshui, which literally means 'wind and water,' is the ancient Chinese art of selecting an auspicious site to provide the most harmonious relationship between human and earth. The term is generally translated as "geomancy," and has had a deep and extensive impact on Korean, Chinese, and other East Asian cultures. Hong-key Yoon's book explores the nature of geomantic principles and the culture of practicing them in Korean cultural contexts. Yoon first examines the nature and historical background of geomancy, geomantic principles for auspicious sites (houses, graves, and cities) and provides an interpretation of geomantic principles as practiced in Korea. Yoon looks at geomancy's influence on cartography, religion and philosophy, and urban development in both Korea and China. Finally, Yoon debates the role of geomancy in the iconographical warfare between Japanese colonialism and Korean nationalism as it affected the cultural landscape of Kyongbok Palace in Seoul.
