This report is based on an exhaustive review of the published literature on the definitions, measurements, epidemiology, economics and interventions applied to nine chronic conditions and risk factors.

In this updated reissue of their classic Homeopathy: A Frontier in Medical Science, Italian physicians Paolo Bellavite and Andrea Signorini thoroughly examine previous and current literature on the science of homeopathy in order to discover answers to the elemental questions about homeopathy. Bellavite and Signorini engage in a fascinating discussion of the biophysics of water, biological effects of electromagnetic fields, chaos theory, and fractals.

Extensively illustrated and liberally laced with clinically helpful tools, Clinical Adult Neurology is an affordable reference for all clinicians and residents. With emphasis on diagnostic tools and strategies as well as management pearls and perils, Clinical Adult Neurology will meet the needs of all health care practitioners caring for patients with neurologic disorders. The book is organized into three sections, with Section 1 covering all aspects of neurologic evaluation, Section 2 describing common clinical problems in neurology, and Section 3 discussing all aspects of neurologic diseases. All sections and chapters emphasize the clinical approach to the patient with consistently useful pedagogical tools, including Features tables for diagnostic help with all neurologic diseases, Pearls and Perils boxes that represent pithy distillations of clinical wisdom from leading experts, Key Clinical Questions boxes that help clinicians frame patient diagnosis and management; and annotated bibliographies that highlight the most important references for further study. The book's organization, format, and features all stress the efficient and well-rationed use of medical care for patients with neurologic disease. Succinct content presentations make all information easy to locate and digest. The format will also be a helpful tool for those preparing for examinations. Highlights include: An emphasis on diagnosis, management, and all pertinent clinical issues Heavily illustrated Contributions by the foremost experts on all aspects of neurologic diseases Extensive use of clinically helpful tables, charts, and boxes with practical advice on all aspects of diagnosis and management

This is a standard work of reference for the study of the religious history of western Christianity in the later middle ages which, since its original publication in French in 1981, has come to be regarded as one of the great contributions to medieval studies of recent times. Hagiographical texts and reports of the

processes of canonisation - a mode of investigation into saints' lives and their miracles implemented by the popes from the end of the twelfth century - are here used for the first time as major source materials. The book illuminates the main features of the medieval religious mind, and highlights the popes' attempts to gain firmer control over the wide variety of expressions of faith towards the saints in order to promote a higher pattern of devotion and moral behaviour among Christians.

"The multifarious and sometimes contested concept of "shamanism" has aroused intense popular and scholarly interest since its initial coinage by the Russian scholar V. M. Mikhailovsky in the late 19th century. In this book, three leading scholars, representing different branches of the humanities, dwell on the current status of shamanic practices and conceptions of the soul, both as 'etic' scholarly categories in historical research and as foci of spiritual revitalization among the indigenous populations of post-Soviet Siberia. Framed by an introduction and a critical afterword by historian of religions Ulf Drobin, the three essays address issues crucial to the understanding of cultural history and the history of religions. Marjorie Mandelstam Balzer, Research Professor in CERES, and the Department of Anthropology at the University of Georgetown, Jan N. Bremmer, professor emeritus and former Chair of Religious Studies at the Faculty of Theology and Religious Studies of the University of Groningen and Carlo Ginzburg at Scuola Normale Superiore di Pisa. The editor Peter Jackson, is Professor at the Department of Ethnology, History of Religions and Gender Studies at Stockholm University." This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

This inspirational book blends elements of shamanism with inherited traditions and contemporary religious commitments. Drawing on shamanic practices from the world over, SHAMANISM AS A SPIRITUAL PRACTICE FOR DAILY LIFE addresses the needs of contemporary people who yearn to deepen their own innate mystical sensibilities. This inspirational book shows how to develop a personal spiritual practice by blending elements of shamanism with inherited traditions and current religious commitments. Contents include: The central role of power animals and spirit teachers. Visionary techniques for exploring the extraordinary in everyday life. Elements of childhood spirituality including songs, secret hiding places, power spots, and imaginary power figures. A journey to an ancestral shaman to recover lost knowledge.

This book proposes an integrated model of treatment for Personality Disorders (PDs) that goes beyond outdated categorical diagnoses, aiming to treat the general factors underlying the pathology of personality. The authors emphasize the development of metacognitive functions and the integration of procedures and techniques of different psychotherapies. The book addresses the treatment of complex cases that present with multiform psychopathological features, outlining clinical interventions that focus on structures of personal meaning, metacognition and interpersonal processes. In addition, this book: Provides an overview of pre-treatment phase procedures such as assessment interviews Explains the Metacognitive Interpersonal Therapy (MIT) approach and summarizes MIT clinical guidelines Outlines pharmacological treatment for patients with PDs Includes checklists and other useful resources for therapists evaluating their adherence to the treatment method Complex Cases of Personality Disorders: Metacognitive and Interpersonal Therapy is both an insightful reexamining of the theoretical underpinnings of personality disorder treatment and a practical resource for clinicians.

This collection of eleven essays originally appeared in France thirty years ago and created a literary whirlwind on the Left Bank. Cioran writes incisively about Western civilizations, the writer, the novel, mystics, apostles, and philosophers. *The Temptation to Exist* first introduced this brilliant European thinker twenty years ago to American readers, in a superb translation by Richard Howard. This literary mystique around Cioran continues to grow, and *The Temptation to Exist* has become an underground classic. In this work Cioran writes about Western civilizations, the writer, the novel, about mystics, apostles, philosophers. For those to whom the very word philosophy brings visions of arduous reading, be assured: Cioran is crystal-clear, his style quotable and aphoristic. "A sort of final philosopher of the Western world. His statements have the compression of poetry and the audacity of cosmic clowning" *The Washington Post*
