Following the familiar, easy-to-use at a Glance format, Haematology at a Glance, Fourth Edition is a broad and accessible introduction to the study of blood. Fully revised and updated to reflect advances in the field and in clinical practice, this new edition covers essential knowledge, from basic haematological physiology to blood disorders and their diagnosis and treatment. This new edition of Haematology at a Glance: • Features expanded sections on the underlying mechanisms, diagnostic techniques and management of the malignant haematological diseases. Also incorporates recent advances in knowledge of thrombosis and the newer oral anticoagulants • Contains the very latest clinical treatments • Includes updated illustrations and clinical photographs to illustrate concepts and aid understanding • Features extensive online self-assessment at [www.ataglanceseries.com/haematology](http://www.ataglanceseries.com/haematology) This book is an invaluable resource for medical students and health professionals wanting to consolidate and expand their knowledge of haematology.

This highly revised and updated atlas is the third edition of an essential reference in the field of hematology. Highly illustrated, this colorful visual diagnostic aid condenses the pathogenesis, clinical, morphological, and investigative aspects of the whole range of blood disorders into one, comprehensive resource. The detailed reproduction of photomicrographs, along with concise, clinically-directed text facilitates the recognition of morphological abnormalities in blood and bone marrow cells. The highly accessible format of this text enables quick and easy reference for anyone using it.

Thoroughly revised and updated, ABC of Clinical Haematology is an essential guide and introduction to clinical haematology and to the treatment and management of common blood related disorders. The fourth edition contains new chapters that reflect the most recent developments whilst other chapters have been extensively revised to include the new tests and treatments that are now available for certain conditions such as chronic leukaemia, multiple myeloma and bleeding disorders. With contributions from leading experts in their respective fields, this text provides an ideal reference for primary care practitioners and other healthcare professionals working with patients who have blood related problems.

The textbook of choice for trainees and practitioners in haematology Over five editions Postgraduate Haematology has built a reputation as an extremely practical, user-friendly, reliable source of information for examination preparation and clinical practice. Completely revised to reflect the latest research in the field, this edition continues to provide trainees with up-to-date knowledge on the pathogenesis, clinical and laboratory features, and management of blood disorders. It covers the significant advances which have occurred in the application of cytogenetics and molecular genetics in the diagnosis, classification and understanding of haematological disorders. Coupled with the expertise of 34 new contributors from across Europe, the editors have been joined by Professor Anthony Green, from the University of Cambridge, and they have reorganised the book into 52 accessible chapters. Postgraduate Haematology is richly illustrated throughout with over 450 colour illustrations including line drawings, photomicrographs of blood cells and tissues, and algorithms to help aid treatment decision making. Providing essential information needed in clinical practice for the diagnosis and management of patients with blood disorders, this handbook covers

haematological investigations and their interpretation, and commonly used protocols.

The international symposia on blood transfusion in Groningen have taken place without interruption since 1976. Each year Dr. Smit-Sibinga and his team have not only organized a meeting on timely topics in blood transfusion, but also succeeded in attracting prominent chairmen and speakers. The subject of the 24th Symposium was Molecular Biology in Blood Transfusion and it was chaired by Dr. Harvey G. Klein, National Institutes of Health, USA. In this book of proceedings an extraordinary range of subjects is covered, including diagnostic aspects, virology, quality control, cell and protein processing as well as a section on new horizons in clinical medicine.
