This book provides a comprehensive introduction to the basic legal principles of the UK constitution. It places the law in the context of the main political ideas which have influenced its development and discusses some of the most fundamental questions about government.

Constitutional Law, Administrative Law, and Human Rights provides an introduction to public law which draws on developments in politics, the law and society to help the reader gain a fundamental appreciation of the law in its wider context.

The levels and sites of governmental power have moved so rapidly in the last few decades that the maps provided by many traditional textbooks scarcely resemble the realities of today's constitutional landscape. The changes wrought by developments such as devolution, the Human Rights Act, privatization and the influence of Europe require a fresh approach to the study of constitutional law in the United Kingdom. There is a need to shift the focus from institutions exclusively to an account that considers constitutional values and processes. This book provides a critical but readable introduction to constitutional law as a study of the organization and control of public power. Among its key themes are the changing nature of the state, new structures of governance, citizenship, Europe and the changing role of the judiciary. It is designed to be accessible to undergraduates and will be a useful work for anyone approaching the subject for the first time.

The fourth edition of *Constitutional and Administrative Law: Text with Materials* provides a wealth of essential materials drawn from a wide range of sources and integrated with lively commentary. It enables students to gain a full understanding of public law by explaining the context of its historical development and current political climate.
