Recent advances in the biosciences have led to a range of powerful new technologies, particularly nucleic acid, protein and cell-based methodologies. The most recent insights have come to affect how scientists investigate and define cellular processes at the molecular level. This book expands upon the techniques included in the first edition, providing theory, outlines of practical procedures, and applications for a range of techniques. Written by a well-established panel of research scientists, the book provides an up-to-date collection of methods used regularly in the authors' own research programs.

This volume brings together the findings from separate studies of community-based and school-based mentoring to unpack the

common response to the question of what makes youth mentoring work. A debate that was alive in 2002, when the first *New Directions for Youth Development* volume on mentoring, edited by Jean Rhodes, was published, centers on whether goal-oriented or relationship-focused interactions (conversations and activities) prove to be more essential for effective youth mentoring. The consensus appeared then to be that the mentoring context defined the answer: in workplace mentoring with teens, an instrumental relationship was deemed essential and resulted in larger impacts, while in the community setting, the developmental relationship was the key ingredient of change. Recent large-scale studies of school-based mentoring have raised this question once again and suggest that understanding how developmental and instrumental relationship styles manifest through goal-directed and relational interactions is essential to effective practice. Because the contexts in which youth mentoring occurs (in the community, in school during the day, or in a structured program after school) affect what happens in the mentor-mentee pair, our goal was to bring together a diverse group of researchers to describe the focus, purpose, and authorship of the mentoring interactions that happen in these contexts in order to help mentors and program staff better understand how youth mentoring relationships can be effective. This is the 126th issue of *New Directions for Youth Development* the Jossey-Bass quarterly report series dedicated to bringing together everyone concerned with helping young people, including scholars, practitioners, and people from different disciplines and professions. The result is a unique resource presenting thoughtful, multi-faceted approaches to helping our youth develop into responsible, stable, well-rounded citizens.

The second edition features: a CD with all of the book's Amos, EQS, and LISREL programs and data sets; new chapters on importing data issues related to data editing and on how to report research; an updated introduction to matrix notation and programs that illustrate how to compute these calculations; many more computer program examples and chapter exercises; and increased coverage of factors that affect correlation, the 4-step approach to SEM and hypothesis testing, significance, power, and sample size issues. The new edition's expanded use of applications make this book ideal for advanced students and researchers in psychology, education, business, health care, political science, sociology, and biology. A basic understanding of correlation is assumed and an understanding of the matrices used in SEM models is encouraged.

Originally published: New York: Viking, 1939.

During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The *American Guide* series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of

local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state ' s unique flavor. The Granite State has a rich history and varied landscape, beautifully presented in the WPA Guide to New Hampshire. The driving tours highlight the White Mountains, Lake Winnepesaukee, and the coast near Portsmouth. This New Hampshire guide also has traditional photographs of churches, landscapes, and colonial houses which give readers a feel for life in New England in the early 20th century.
