Love Medicine, then, is a book about the prairie that examines the wild, chaotic lives of several Indian families whose lives on the reservation have immersed them in a dark and often violent existence, one that the author seems to equate with Ahab. It is a world created by a white—shall we say malicious—intelligence, except that behind the scenes hovers an amazing human being, June Kashpah, whose life and recent death still give meaning and hope to its members.

There's lots to enjoy about Louise Erdrich's Love Medicine which is variously badged as a novel and a collection of linked short stories. The insights Erdrich gives us into the world and lives of native Americans from the 1930s until the late twentieth century are fascinating - as far as I know, little has been written about this from the insider perspective.

The first of Louise Erdrich ' s polysymphonic novels set in North Dakota – a fictional landscape that, in Erdrich ' s hands, has become iconic – Love Medicine is the story of three generations of Ojibwe families. Set against the tumultuous politics of the reservation, the lives of the Kashpaws and the Lamartines are a testament to the endurance of a people and the sorrows of history.

"A beautiful collaboration that brings together diverse perspectives...a common passion and sense of beauty unites the book and transcends any expectations." —BOOKLIST A diverse array of people—psychologists and poets, biologists and artists, a Buddhist teacher and a rock musician—share personal stories that reveal a common theme: when we pay conscious, careful attention to our wider world, we strengthen our core humanity. This practice of natural history leads to greater physical, psychological, and social health for individuals and communities. *Nature, Love, Medicine* features writers with varied backgrounds and talents. Notable contributors range from conservationist and author Brooke Williams and award-winning author Elisabeth Tova Bailey to Vietnamese Buddhist monk and teacher Thich Nhat Hanh and internationally known poet Jane Hirshfield. THOMAS LOWE FLEISCHNER, editor of *Nature, Love, Medicine*, is a naturalist and conservation biologist, and founding director of the Natural History Institute at Prescott College, where he has taught interdisciplinary environmental studies for almost three decades. He edited *The Way of Natural History* and authored *Singing Stone: A Natural History of the Escalante Canyons and Desert Wetlands*.

Our market-based, profit-driven health care system in the United States has put necessary care increasingly beyond the reach of ordinary Americans. Primary health care, the fundamental foundation of all high-performing health care systems in the world, is a critical but ignored casualty of the current system. Unfortunately, primary care is often poorly understood, even within the health professions. This book describes what has become a crisis in primary care, defines its central role, analyzes the reasons for its decline, and assesses its impacts on patients and families. A constructive approach is presented to rebuild and transform U.S. primary care with the urgent goal to address the nation's problems of access, cost, quality and equity of health care for all Americans.

Cancer sucks, death sucks even more. But we humans don't have the power to stop either of them from messing with our lives. They enter our lives whenever and wherever they choose to. Cancer is so common that each one of us have known someone who has dealt with the disease; some of us have lost a loved one to cancer. Common does not always mean simple, and it also does not mean we know everything about it. The diagnosis of cancer, regardless of the disease's curability, is almost always nerve-racking, even for healthcare providers like the main character of this book who is a veteran nurse. This book is written in first person; the subject is a middle aged woman who had been separated from her boyfriend some thirty years ago and then after three decades when she searches for an oncologist for treatment of an aggressive cancer that she was recently diagnosed, she finds her ex-boyfriend's name and decides to see him. That brings back the memory of their past together, and she starts going through her old diary she had written some thirty years in the past. Part of the story is set in Nepal (from the diary) and the other part is set in the USA ( this takes place after her cancer diagnosis). The main character of the story was

Louise Erdrich's first novel, Love Medicine, came out in 1984 to instant and international acclaim. A short story cycle narrated by a variety of different characters, the book chronicles the intertwined histories of Chippewa and mixed-blood families in North Dakota over half a century, laying bare the ordeals and joys of twentieth-century Native American life. Like the other books in the series, this Casebook presents important background material to establish the context of the novel, interviews with the author, and pivotal critical responses to the work.
