Indispensable information has been funnelled into a huge new edition, completely rewritten and refreshed by Sam Fadala. This textbook for black powder shooters is topped off by a catalog of all currently-manufactured work powder firearms. The ultimate source for black powder.

If you've ever wanted to reload ammunition but didn't know where to start this book is for you. You'll find detailed chapters about primers, cartridge cases, gun powder, and bullets, explaining in layman's terms what they are, variations you'll encounter and the characteristics of each. You'll also learn the different facets of case preparation: which are necessary and which are optional, and how to do them. You'll learn some characteristics of gunpowder and which types work best with bulk measurements. There'll be detailed photos and explanations teaching the process of reloading ammunition. From there you'll be shown how you can gear up to reload your own ammunition even if you don't have much money or space. Although most of the book is geared toward metallic cartridge reloading there's also a chapter on reloading shotgun ammunition. It too, will show you the steps involved and how to become operational with very little money and minimal space requirements. After reading this book the novice reloader will: (a) be capable of making informed choices when purchasing their equipment and components, (b) be able to understand the reloading process and why certain steps are taken or omitted, (c) have a safe, profitable and enjoyable experience from the very beginning.

The Classic Reference - Bigger and Better than Ever One of the most respected reloading texts of all time, Reloading for Shotgunners is now bigger, more comprehensive and more profusely illustrated than ever! This all-new fifth edition includes exhaustive data for lead and non-toxic shot - and it goes well beyond the ho-hum 2-3/4" 12-gauge data contained in other books. From .410 bored to 10-gauge magnum, from 2" hulls to the mammoth 3-1/2", if it can be fired in a shotgun, it's in this book! Rick Sapp, co-author of The Gun Digest Book of Trap & Skeet, has outdone himself in creating this masterful compilation of shotgun reloading data. Whether you're a novice shotgunner or a seasoned reloader, you can't afford to be without this ground-breaking fifth edition of Reloading for Shotgunners.

Looks at various causes of mountaineering accidents on Colorado's 14,000-foot peaks and highlights lessons to be learned from the misfortunes of climbers who have become stranded, severely injured, or even killed.

This new 6th Edition has been thoroughly updated and includes the following: Expanded to over 1,000 pages and contains 100+ chapters! Over 1,675 individual cartridges/shotshells are listed with historical information in addition to cartridge images with dimensions! The increased 16-page color section now depicts over 320 current rimfire/centerfire cartridges and shotshells in actual size. 10 pages of comprehensive Indexes make finding specific cartridges and information both quick and easy! Cartridge profiles/drawings and ballistic charts have been expanded to include all the new factory cartridges. Even Nosler's new cartridges have been included!

Reloaders Log Book with detailed data sheets to log your favorite ammunition. Keep all your records for your ammo in one place. Track as much as you want to and include your personal notes! 100 pages 8.5" x 11" Softcover

"With ammo shortages on retailer's shelves, unprecedented firearms sales across the country, and burgeoning numbers of new shooters, reloading is growing in leaps and bounds. Handbook of Reloading Basics, written by industry experts Robin Sharpless and Rick Sapp, is aimed squarely at the new handloaders and simplifies both the equipment and the process. Inside this bench-handly reference you'll find: Step-by-step instructions for reloading metallic cartridges and modern shotshells; Press selection--single-stage, turrets and progressives explained; Component breakdown--primers, cases, hulls, powder, wads and bullets; Dozens of illustrative photos and a comprehensive resource listing"--Page 4 of cover.

Become a better long-range shot! How well can you shoot at 200 yards? 500? How about 1,000? L.P. Brenzy has taught many shooters the art of accurate, long range rifle work, and in Gun Digest Book of Long-Range Shooting he shares the skills and practice techniques that will put you on target. You learn: How to select the best rifle and caliber to make the shots you want to make How to select the proper bullet and loading information to get the best performance Practice techniques and how to keep the edge needed to routinely make long, accurate shots How to make accurate distance judgments without the use of high dollar electronics How to know your limitations in hunting situations and make ethical shots

This work provides a guide to loading blackpowder firearms. This edition contains data for 158 blackpowder firearms, basic instructional information, items on equipment and accessories, evaluation tests and a section on materials.
