Explanations to all the questions along with stepwise marking have been provided.

Ensuring optimum ventilation performance is a vital part of building design. Prepared by recognized experts from Europe and the US, and published in association with the International Energy Agency's Air Infiltration and Ventilation Centre (AIVC), this authoritative work provides organized, classified and evaluated information on advances in the key area of building ventilation, relevant to all building types. Complexities in airflow behaviour, climatic influences, occupancy patterns and pollutant emission characteristics make selecting the most appropriate ventilation strategy especially difficult. Recognizing such complexities, the editors bring together expertise on each key issue. From components to computer tools, this book offers detailed coverage on design, analysis and performance, and is an important and comprehensive publication in this field. Building Ventilation will be an invaluable reference for professionals in the building services industry, architects, researchers (including postgraduate students) studying building service engineering and HVAC, and anyone with a role in energy-efficient building design.

This book is a translation of the third edition of the well accepted German textbook 'Stochastik', which presents the fundamental ideas and results of both probability theory and statistics, and comprises the material of a one-year course. The stochastic concepts, models and methods are motivated by examples and problems and then developed and analysed systematically.

The book contains 10 Sample Papers designed on the latest pattern of CBSE Board Exam. The book also provides the 2018 Solved paper along with CBSE Instructions for Marking. Further Answer Sheets of 2017 Topper (provided by CBSE) are also included in the book. The book also provide the complete Latest Syllabus, Blue Prints followed by Chapter-wise MINDMAPS. Explanations to all the questions along with stepwise marking have been provided.
