This edition highlights current issues and emerging trends in the field of educational psychology. The tenth edition continues to have in-depth, practical coverage with a focus on the intentional teacher by presenting up-to-the-minute research that a reflective, intentional teacher can apply. An "intentional teacher," according to Slavin, is one who constantly reflects on his or her practice and makes instructional decisions based on a clear conception

of how these practices affect students. To help readers become “intentional teachers,” the author offers a set of questions to guide them and models best practices through classroom examples.

The fifth edition of Romer's *Advanced Macroeconomics* continues its tradition as the standard text and the starting point for graduate macroeconomics courses and helps lay the groundwork for students to begin doing research in macroeconomics and monetary economics. Romer presents the major theories concerning the central questions of macroeconomics. The theoretical analysis is supplemented by examples of relevant empirical work, illustrating the ways that theories can be applied and tested. In areas ranging from economic growth and short-run fluctuations to the natural rate of unemployment and monetary policy, formal models are used to present and analyze key ideas and issues. The book has been extensively revised to incorporate important new topics and new research, eliminate inessential material, and further improve the presentation.
