A management information system is an advanced system to manage a company ' s or an institution ' s information system. It is a computerized database to organize and program in such a way so that it generates methodical reports for each level of a company. Reports for some special events can easily be obtained from the management information system. In simple words, the Management information system or MIS provides feedbacks to managers themselves about their performances.

12 Different Types Of Management Information Systems

An information management system (IMS) is a set of hardware and software that stores, organizes, and accesses data stored in a database. It also provides tools that allow for the creation of standardized and ad-hoc reports. There are numerous kinds of IMSs that can perform specialized business functions, including the following examples:

*This book balances the positive outcomes of outsourcing, which have made it a popular management strategy with the negative to provide a more inclusive decision; it explores risk factors that have not yet been widely associated with this strategy. It focuses on the conceptual "what", "why", and "where" aspects of outsourcing as well as the methodological "how" aspects"--Provided by publisher.

The authoritative, case-based study of IS in business today, Management Information Systems: Managing the Digital Firm provides the most comprehensive overview of information systems used by business firms today, while drawing connections between MIS and business performance. The Laudons are known for their outstanding real-world case studies, which describe how well-known companies use IT to solve problems and achieve business objectives. Students develop sought-after skills, such as leading IS-related management discussions and using IT to meet bottom-line results. Each chapter of the 16th edition features all-new Interactive Sessions, new Video Cases, and a new Career Opportunities section building practical job-seeking skills. For introductory courses in IS (information systems) and MIS (management information systems), Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience that can be adopted on its own as the main course material. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily customize the table of contents, schedule readings and share their own notes with students so they see the connection between their eText and what they learn in class -- motivating them to keep reading, and keep learning. And, reading analytics offer insight into how students use the eText, helping educators tailor their instruction. NOTE: This ISBN is for the Pearson eText access card. For students purchasing this product from an online retailer, Pearson eText is a fully digital delivery of Pearson content and should only be purchased when required by your instructor. In addition to your purchase, you will need a course invite link, provided by your instructor, to register for and use Pearson eText.
