One of the most rewarding and helpful areas of primary care medicine is the opportunity to relieve the suffering of a patient in pain. Using a hands-on intervention can provide pain relief to the patient and professional satisfaction to the clinician.Manual Medicineoffers primary care physicians, nurse practitioners, and physician assistants the practical, hands-on guidance needed to accurately diagnose and provide initial management of commonly seen musculoskeletal problems. Dr. Frank Domino, along with physical therapists Steve Messineo and Mark Powicki, walk you step by step through the approach to a clinical problem (such as back pain or knee pain) and treatment. These easy-to-use maneuvers provide initial treatment that reduces suffering. This is the tablet version of Manual Medicine for the Primary Care Team: A Hands-On Approach which does not include access to the videos mentioned in the text.

Geared to primary care practitioners, The Washington Manual® of Outpatient Internal Medicine focuses on common ambulatory medical problems encountered in each medical subspecialty. The book has a quick-reference format similar to The Washington Manual® of Medical Therapeutics, with a standard chapter template, a bulleted style, numerous tables and figures, and a two-color design. All chapters are written by house staff and faculty at Barnes-Jewish Hospital and Washington University School of Medicine. Coverage includes the traditional internal medicine subspecialties and other areas where problems are frequently seen in the ambulatory setting, such as dermatology, neurology, ophthalmology, otolaryngology, and psychiatry. Most subspecialties have separate symptom- and disease-based chapters. The Washington Manual® is a registered mark belonging to Washington University in St. Louis to which international legal protection applies. The mark is used in this publication by LWW under license from Washington University.
