The latest digital cameras have made it easy to create images of the landscape at night that film and early digital photographers could only dream of. Equipped with off-the-shelf cameras, more and more photographers are venturing into the night, far beyond the comforting glow of city lights, and returning with spectacular images of places both familiar and unknown that are unlike anything seen before.

Dusk to Dawn: A Guide to Landscape Photography at Night is your guide to this new photographic world. In it, photographer Glenn Randall—author of the bestselling *The Art, Science, and Craft of Great Landscape Photography*—teaches you how to plan, shoot, and process professional-quality images of the Milky Way, the aurora, lunar eclipses, meteor showers, star trails, and landscapes lit solely by moonlight. Throughout the book, Randall emphasizes ways to integrate beautiful depictions of the night sky with equally compelling renditions of the land below it to create complete landscape images that evoke a sense of place—and a sense of wonder. Equipped with the knowledge in this book, readers will be prepared to create their own nocturnal masterpieces.

A collection of images and behind-the-lens insights by the photographer includes dozens of portraits of celebrities, athletes, and world leaders accompanied by essays on his creative and technical processes.
