This is a new content planner designed exclusively for teachers, examiners and education content creators. Create and build a bank of your own unique questions for your own resources and practice papers. Design and record questions focused towards the needs of your students. Create and compile questions for a multiple choice question test. Keep this planner with you and write in your ideas as soon as you have them to review later. In this book you will find 100 pages of templates for writing multiple choice practice questions. There are 60 half page multiple choice questions pages, with two templates per page making room for 120 questions. You can create up to four answers per question. After this, there are 40 full page multiple choice questions pages, allowing for longer questions and up to ten answers per question. Each planning template contains a space to write your question and allocate marks. Need a picture? There is a blank sketch area in each template for drawings and graphs There is a place to allocate a question number, the paper it will be included in, the qualification it is relevant for and a space to identify the relevant learning object being assessed. Is there a particular question you have seen in a textbook, published paper or online that you would like to reference or model? No problem! At the top section of each template you can note the location of an inspiration or reference question. There is a place for additional notes. Each multiple choice template contains the following: - Space to write your question - A blank sketch area - 4 or 10 multiple choice answer boxes to create your answers - Decision boxes about the nature of your answer, whether it is the correct answer, a distractor, a misconception or another type of answer - An area to write down any reference or inspiration question - A place for the question number, paper allocation, relevant qualification, assessment objectives covered and additional notes. Ultimately, we know you will want to compile appropriate questions together and write them up neatly on a computer producing a fantastic new resource At the rear of the planner are six question compilers. This enables you to list and page reference up to thirty questions per resource and order them how you would like, before transferring to a computer to create your new practice activity. The Multiple Choice Question Planner is designed primarily for mathematics and STEM subject teachers, lecturers and examiners, but is flexible enough to be used by any subject teacher. Additionally, there is also an example of how to use each section on the template to make it clear how you can get the most out of the planner. Contains 120 half page templates, 40 full page templates and 6 compilers so you can create up to six, 30 question multiple choice tests per planner. Size 8.5 by 11 inches (216 by 279 mm).

-Why practice taking exams?- Siegel's Essay and Multiple-Choice Questions and Answers are designed to show you how to handle law school examination questions. Siegel's have been used by thousands of law students during the past decade, and any one will tell you why – doing practice exam questions is the key to exam success. To ace your exams, you must (1) memorize blackletter principles and rules of law for each subject, and (2) understand how those principles of law arise within a test fact pattern. One of the most common misconceptions about law school is that you must memorize each word on every page of your casebooks or outlines to do well on exams. The reality is that you can commit an entire casebook to memory and still do poorly on an exam. Reviewing hundreds of student answers has shown us that most students pretty much know the law. The ones who do best on exams understand how legal problems (issues) stem from from the rules of law which they have memorized and how to communicate their analysis of these issues to the grader. Working through Siegel's essay and multiple-choice questions and answers will give you the practice you need to achieve superior scores on your law school exams. Each essay question comes with an extensive, well-organized model answer. Every multiple-choice question comes with a detailed answer that tells you not only why the correct answer is correct, but why each of the other choices are wrong, so you can better understand why you're choosing the wrong answer. Brian Siegel is a Columbia Law School graduate and is the author of How to Succeed in Law School and numerous works pertaining to preparation for the California Bar examination. Professor Siegel has taught as a member of the adjunct faculty at Pepperdine School of Law and Whittier College School of Law, as well as for the UCLA Extension Program. -----
