A detailed and scholarly historical study of the International Accounting Standards Committee (IASC), which prepared the way for the International Accounting Standards Board (IASB). The IASB holds the dominant influence over the financial reporting of thousands of listed companies in the European Union as well as in many other countries.

This book constitutes the refereed proceedings of the Third International Workshop on Algorithms in Bioinformatics, WABI 2003, held in Budapest, Hungary, in September 2003. The 36 revised full papers presented were carefully reviewed and selected from 78 submissions. The papers are organized in topical sections on comparative genomics, database searching, gene finding and expression, genome mapping, pattern and motif discovery, phylogenetic analysis, polymorphism, protein structure, sequence alignment, and string algorithms.
