Use Virtual ChemLab to do almost any lab or procedure that can be performed in a real lab. Choose from 30 exciting pre-built labs or design your own--in less time, and with no clean-up, safety, or equipment issues. Find realistic lab environments for Inorganic Chemistry, Calorimetry, Titrations, Gases, and Quantum Chemistry.

The Laboratory Manual for General, Organic, and Biological Chemistry , third edition, by Karen C. Timberlake contains 35 experiments related to the content of general, organic, and biological chemistry courses, as well as basic/preparatory chemistry courses. The labs included give students an opportunity to go beyond the lectures and words in the textbook to experience the scientific process from which conclusions and theories are drawn.

For lab courses in introductory, preparatory, and basic chemistry. Prepare introductory chemistry students for laboratory and provide a safe experience Emphasizing environmental considerations, Corwin's acclaimed Laboratory Manual for Introductory Chemistry offers a proven format of a pre-laboratory assignment, a stepwise procedure, and a post-laboratory assignment. More than 500,000 students to date in Introductory Chemistry, Preparatory Chemistry, and Allied Health Chemistry have used these experiments successfully. The 7th Edition continues to evolve with increased sensitivity to environmental and safety concerns in the laboratory. Recycle icons in the margin of each procedure alert students to recycle chemical waste and "green chemical" indicators remind students to use the appropriate waste containers provided to dispose of chemicals. Corwin's lab manual can be packaged with any Pearson Intro Prep Chemistry book.

Prepared by John H. Nelson and Kenneth C. Kemp, both of the University of Nevada. This manual contains 43 finely tuned experiments chosen to introduce students to basic lab techniques and to illustrate core chemical principles. You can also customize these labs through Catalyst, our custom database program. For more information, visit <http://www.pearsoncustom.com/custom-library/catalyst> In the Thirteenth Edition, all experiments were carefully edited for accuracy and safety. Pre-labs and questions were revised and several experiments were added or changed. Two of the new experiments have been added to Chapter 11.

Contains experiments that weave together general, organic, and biochemical concepts to help students construct a coherent framework for understanding chemistry. This is the lab manual to accompany the textbook "General, organic, and biological chemistry : an integrated approach" by Todd S. Deal, Laura D. Frost, and Karen Timberlake.
