Sign the contract...then write the book. The good news is that almost every nonfiction book published is sold by a proposal. In this comprehensive yet accessible guide, you will learn exactly what a proposal is, what it must contain, and how to pull yours together into an informative, persuasive selling package. Already a favorite for thousands of aspiring writers, this book has been revised and updated by Elizabeth Lyon to feature nearly two dozen actual proposals, plus:

- Choosing a topic based on current trends and competing titles
- Drafting the perfect concept statement—daring agents and editors to reject you
- Defining and targeting your readership—then connecting with them
- Preparing a table of contents and chapter summaries
- Submitting exciting and well-written sample chapters
- Writing query letters
- Devising a marketing plan that will excite agents and publishers

This Second Edition of Diana Ridley's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

The public assumes the researcher spends the day dreaming up and trying out creative ideas. In reality, proposal development is an invisible but critical barrier over which even a good researcher may tumble. This book is intended to lower that barrier. It should increase first-trial recognition of good ideas and ensure that rejections do not result because a proposal poorly represented either the ideas, the investigator, or both.

This helpful step-by-step handbook will guide the reader through each stage of doing a research proposal from choosing a subject right through to writing it up.

The doctoral facts of life: the beginning -- Researching your committee: the really critical research project -- Selecting a dissertation topic -- Spending money and using the 21st century to your advantage -- Designing your dissertation and preparing the prospectus and proposal -- Writing the dissertation: twenty workdays to go! -- Defending the dissertation: two hours to doctor! -- Celebrating, the last revision, post-partum depression

This book provides information about the key areas needed for a successful project. It includes software skills, developing research objectives, writing

proposals, literature reviews, getting ethics approval, seeking funding, managing a project, communicating research findings, and writing reports. There is also a chapter on working as an independent researcher. The book includes numerous examples, checklists, and practical exercises designed to assist the learning of research skills and the completion of crucial project tasks. It covers procedures needed for conducting projects electronically and accessing information from the Internet.

This book offers a comprehensive and well-rounded view of research as a tool for problem-solving in the wide range of the social sciences. It is built on the foundation of philosophical pragmatism, postulating that the value of knowledge and research methodologies lie in their usefulness in engaging with the real world. The book synthesizes both positivist and non-positivist methodologies. It is meant for students who are undertaking their first research course or project. The techniques, while basic in nature, are used in many masters and doctoral research studies. The book uses engaging language, real-life examples from various subject areas and follows an inductive approach. With the help of this book, from an experiential base, students should be able to build a more advanced conceptual and theoretical understanding of research through further reading and practice. This book discusses a policy-applied-pure-action model of research covering both quantitative and qualitative methods for case study, survey and experimental designs. It pays considerable attention to measurement principles and to data analysis techniques that make practical use of Microsoft Excel for analysis of both words and numbers. It includes a building block approach to writing, as well as the author's thoughts on application of research in the real world.
