"From the elite performance coach for Michael Jordan, Kobe Bryant, Dwyane Wade, and many others-and the author of the powerful bestseller Relentless-a no-holds-barred formula for winning that is ideal for business people, athletes, and anybody wanting to achieve success. In Relentless, Tim Grover showed that you need to be tough and ruthless-toward others and yourself-to achieve your goals. Now, in Winning he takes that skill repertoire to an even higher level, demonstrating why he is one of the world's most sought-after mindset experts. Based on three decades of work with elite competitors like Michael Jordan, Kobe Bryant, and Dwyane Wade, Winning challenges you to destroy every obstacle in your path, even if, at the moment of greatest triumph, it may be all taken away. Whether you're an athlete striving to win, an entrepreneur building a business, a CEO managing an empire, a salesperson looking to close a deal, or a high achiever determined to stand in the winner's circle, Winning offers thirteen key principles for ramping up your performance to the maximum. If you're addicted to the taste of success and crave more, then you're ready for the results-driven performance formula found here. And if you're already winning and want to learn how to execute excellence repeatedly-so you can own not just this moment, but the next, and the next-then Winning is for you"--

Published in Indonesia in 2005, The Rainbow Troops, Andrea Hirata's closely autobiographical debut novel, sold more than five million copies, shattering records. Now it promises to captivate audiences around the globe. Ikal is a student at the poorest village school on the Indonesian island of Belitung, where graduating from sixth grade is considered a remarkable achievement. His school is under constant threat of closure. In fact, Ikal and his friends—a group nicknamed the Rainbow Troops—face threats from every angle: skeptical government officials, greedy corporations hardly distinguishable from the colonialism they've replaced, deepening poverty and crumbling infrastructure, and their own low self-confidence. But the students also have hope, which comes in the form of two extraordinary teachers, and Ikal's education in and out of the classroom is an uplifting one. We root for him and his friends as they defy the island's powerful tin mine officials. We meet his first love, the unseen girl who sells chalk from behind a shop screen, whose pretty hands capture Ikal's heart. We cheer for Lintang, the class's barefoot math genius, as he bests the students of the mining corporation's school in an academic challenge. Above all, we gain an intimate acquaintance with the customs and people of the world's largest Muslim society. This is classic storytelling in the spirit of Khaled Hosseini's The Kite Runner: an engrossing depiction of a milieu we have never encountered before, bursting with charm and verve.

This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.
