"At the core, Hit Refresh, is about us humans and the unique quality we call empathy, which will become ever more valuable in a world where the torrent of technology will disrupt the status quo like never before." – Satya Nadella from Hit Refresh "Satya has charted a course for making the most of the opportunities created by technology while also facing up to the hard questions." – Bill Gates from the Foreword of Hit Refresh The New York Times bestseller Hit Refresh is about individual change, about the transformation happening inside of Microsoft and the technology that will soon impact all of our lives—the arrival of the most exciting and disruptive wave of technology humankind has experienced: artificial intelligence, mixed reality, and quantum computing. It's about how people, organizations, and societies can and must transform and "hit refresh" in their persistent quest for new energy, new ideas, and continued relevance and renewal. Microsoft's CEO tells the inside story of the company's continuing transformation, tracing his own personal journey from a childhood in India to leading some of the most significant technological changes in the digital era. Satya Nadella explores a fascinating childhood before immigrating to the U.S. and how he learned to lead along the way. He then shares his meditations as a sitting CEO—one who is mostly unknown following the brainy Bill Gates and energetic Steve Ballmer. He tells the inside story of how a company rediscovered its soul—transforming everything from culture to their fiercely competitive landscape and industry partnerships. As much a humanist as engineer and executive, Nadella concludes with his vision for the coming wave of technology and by exploring the potential impact to society and delivering call to action for world leaders. "Ideas excite me," Nadella explains. "Empathy grounds and centers me." Hit Refresh is a set of reflections, meditations, and recommendations presented as algorithms from a principled, deliberative leader searching for improvement—for himself, for a storied company, and for society.

World Economic Forum Founder and Executive Chairman Klaus Schwab offers a practical companion and field guide to his previous book The Fourth Industrial Revolution. Today, technology is changing everything—how we relate to one another, the way we work, how our economies and governments function, and even what it means to be human. One need not look hard to see how the incredible advances in artificial intelligence, cryptocurrencies, biotechnologies, and the internet of things are transforming society in unprecedented ways. But the Fourth Industrial Revolution is just beginning, says Schwab. And at a time of such tremendous uncertainty and such rapid change, he argues it's our actions as individuals and leaders that will determine the trajectory our future will take: We all have a responsibility – as citizens, businesses, and institutions – to work with the current of progress, not against it, to build a future that is ethical, inclusive, sustainable and prosperous. Drawing on contributions from 200 top experts in fields ranging from machine learning to geoeengineering to nanotechnology, to data ethics, Schwab equips readers with the practical tools to leverage the technologies of the future to leave the world better, safer, and more resilient than we found it.

From the CEO of Microsoft, Satya Nadella, is an inspiring account of the transformation of an organisation and the coming transformation of humanity. As told by Microsoft CEO Satya Nadella, Hit Refresh is the story of corporate change and reinvention as well as the story of Nadella's personal journey, one that is taking place today inside a storied technology company, and one that is coming in all of our lives as intelligent machines become more ambient and more ubiquitous. It's about how people, organisations and societies can and must hit refresh - transform - in their persistent quest for new energy, new ideas, relevance and renewal. At the core, it's about us humans and our unique qualities, like empathy, which will become ever more valuable in a world where the torrent of technology will disrupt like never before. As much a humanist as a technologist, Nadella defines his mission and that of the company he leads as empowering every person and every organisation on the planet to achieve more.

What is business for? Day one of a business course will tell you: it is to maximise shareholder profit. This single idea pervades all our thinking and teaching about business around the world but it is fundamentally wrong. Colin Mayer argues. It has had disastrous and damaging consequences for our economies, environment, politics, and societies. In this urgent call for reform, Prosperity challenges the fundamentals of business thinking. It sets out a comprehensive new agenda for establishing the corporation as a unique and powerful force for promoting economic and social wellbeing in its fullest sense - for customers and communities, today and in the future. First Professor and former Dean of the Saïd Business School in Oxford, Mayer is a leading figure in the global discussion about the purpose and role of the corporation. In Prosperity, he presents a radical and carefully considered prescription for corporations, their ownership, governance, finance, and regulation. Drawing together insights from business, law, economics, science, philosophy, and history, he shows how the corporation can realize its full potential to contribute to economic and social wellbeing of the many, not just the few. Prosperity tells us not only how to create and run successful businesses but also how policy can get us there and fix our broken system.

The guru of virtual reality looks back at the unique experiences that formed his vision for the future of technology With a singular voice and perspective, Lanier who The New York Times calls "daringly original ... a major wizard in the futurist circus. He is the father of virtual reality in the gaudy, reputation-burnishing way that Michael Jackson was the king of pop" considers the future of virtual technology in a book that blends memoir with ideas. He tells the wild story of his own relationship with technology by starting from the beginning. The son of Jewish immigrants and concentration camp survivors, raised in the UFO territory of New Mexico, he lost his mother at a young age and built a geodesic dome with his father in the desert. He worked as a goatherd and midwife, attended college before graduating high school, transferred to and failed out of a tony northeast liberal arts college, played music for money on the streets of New York, and eventually landed in Silicon Valley at the dawn of the first tech boom where he suddenly became rich. This crazy course to becoming a world renowned technology guru informs Lanier's optimism about virtual reality—the technology he has been immersed in from its very start. While he has been very critical of social media and other manifestations of technology, he believes that virtual reality can actually make our lives richer and fuller.Dawn of the New Everything is ultimately a look at what it means to be human in the dawn of unprecedented technological possibility.

The New York Times bestseller, now updated with new material on cyber attacks, digital sovereignty, and tech in a pandemic. From Microsoft's president and one of the tech industry's broadest thinkers, a frank and thoughtful reckoning with how to balance enormous promise and existential risk as the digitization of everything accelerates. "A colorful and insightful insiders' view of how technology is both empowering and threatening us. From privacy to cyberattacks, this timely book is a useful guide for how to navigate the digital future." —Walter Isaacson Microsoft president Brad Smith operates by a simple core belief: When your technology changes the world, you bear a responsibility to help address the world you have helped create. In Tools and Weapons, Brad Smith and Carol Ann Browne bring us a captivating narrative from the top of Microsoft, as the company flies in the face of a tech sector long obsessed with disruption as an end in itself, and in doing so navigates some of the thorniest issues of our time—from privacy to cyberwar to the challenges for democracy, far and near. As the tumultuous events of 2020 brought technology and Big Tech even further into the lives of almost all Americans, Smith and Browne updated the book throughout to reflect a changed world. With three new chapters on cybersecurity, technology and nation-states, and tech in the pandemic, Tools and Weapons is an invaluable resource from the cockpit of one of the world's largest tech companies.

Soon enough, nobody will remember life before the Internet. What does this unavoidable fact mean? Those of us who have lived both with and without the crowded connectivity of online life have a rare opportunity. We can still recognize the difference between Before and After. We catch ourselves idly reaching for our phones at the bus stop. Or we notice how, midconversation, a fumbling friend dives into the perfect recall of Google. In this eloquent and thought-provoking book, Michael Harris argues that amid all the changes we're experiencing, the most interesting is the end of absence—the loss of lack. The daydreaming silences in our lives are filled, the burning solitudes are extinguished. There's no true "free time" when you carry a smartphone. Today's rarest commodity is the chance to be alone with your thoughts. Michael Harris is an award-winning journalist and a contributing editor at Western Living and Vancouvermagazines. He lives in Toronto, Canada.
