The Expedient Utopian: Bandaranaike and Ceylon by James Manor (2009-03-19): James Manor: Books - Amazon.ca

This study of S. W. R. D. Bandaranaike, the pivotal figure in the emergence of modern politics in Sri Lanka, makes a major contribution to an important yet neglected period in the country's political history. Dr James Manor explores the personal and political dimensions of Bandaranaike's life, concentrating on the economic, social, political and cultural forces which had a substantial bearing upon his story. Bandaranaike is assessed as a member of that generation of Asian and African leaders who presided over the transition from imperial rule to assertive self-government and helped to develop new modes of politics. Bandaranaike's story illuminates the development of democratic politics in Sri Lanka as well as the origins of current tensions between Sinhalese and Tamils, which threaten to destroy democracy and the island's social cohesion.

Examining Sri Lanka's religious and legal pasts, this is the first extended study of Buddhism and constitutional law.

Empirically thorough and conceptually clear, Crafting State-Nations will have a substantial impact on the study of comparative political institutions and the conception and understanding of nationalism and democracy.

"In recent years much has been written about what Tambiah calls 'the strange malformations' that have resulted at the end of the twentieth century from complex combinations of nationalism, ethnicity, demands for self-determination, and social groups defining each other in terms of religious identity. No one, however, has analyzed how these factors lead to the violence that has become the characteristic of our time as brilliantly as Tambiah has in this remarkable book. His insights as a social science into the political and cultural history of South Asia are informed by a passionate humanism that gives us a new understanding of the dark tragedies of our time."—Ainslie Embree, Professor Emeritus of History, Columbia University "Resolutely transgressing disciplinary and spatial boundaries, Tambiah offers a scholarly but accessible, a focused but wide-ranging analysis that places ethnicity on the borderlines of the old and the new, the past and the present, politics and culture...With uncanny skill, he turns the contemporary worry about ethnic politics and violence into a brilliant meditation on the history of nationalism, nation-states, and world-capitalism—in a word, modernity itself. No student of modernity, let alone ethnicity in South Asia and other regions, can afford to ignore this thoughtful inquiry into our modern history."—Gyan Prakash, Princeton University

In Ordering Violence, Paul Staniland advances a broad approach to armed politics—bringing together governments, insurgents, militias, and armed political parties in a shared framework—to argue that governments' perception of the ideological threats posed by armed groups drive their responses and interactions. Staniland combines a unique new dataset of state-group armed orders in India, Pakistan, Burma/Myanmar, and Sri Lanka with detailed case studies from the region to explore when and how this model of threat perception provides insight into patterns of repression, collusion, and mutual neglect across nearly seven decades. Instead of straightforwardly responding to the material or organizational power of armed groups, Staniland finds, regimes assess how a group's politics align with their own ideological projects. Explaining, for example, why governments often use extreme repression against weak groups even while working with or tolerating more powerful armed actors, Ordering Violence provides a comprehensive overview of South Asia's complex armed politics, embedded within an analytical framework that can also speak broadly beyond the subcontinent.

Over 1,100 alphabetically arranged entries examine the history, geography, people, government, economy, art, and religions of Sri Lanka.

A selection of essays about the constitutional crises throughout the Commonwealth since the Second World War, from Australia, Ceylon, Pakistan, Nigeria, Fiji, India, Grenada, Malaysia and Canada, which examines, in particular, the role and involvement of the Governor-General.

This volume seeks to answer the question of how the Buddhist monks in today's Sri Lanka—given Buddhism's traditionally nonviolent philosophy—are able to participate in the fierce political violence of the Sinhalese against the Tamils.

Representing a unique reference tool for readers interested in history, criminology, or terrorism, this book provides the most complete and up-to-date coverage of assassinations of key figures throughout history and around the world. • Provides timely content about past assassinations that will enable students to better understand historical and contemporary social unrest • Introduces new informaton and theories on historic cases of assassination that in some cases afford novel interpretations of "what really happened" • Establishes the links between famous or notorious social movements and political assassinations, underscoring how an individual or a small group can be motivated to commit an act of violence by the climate of their society • Includes more than 20 primary source documents that provide accounts of assassinations in world history as well as numerous sidebars that augment the reading experience with interesting discussions of individuals, groups, movements, or events related to important assassinations

From the bestselling author of A History of Britain in 21 Women The history of the world is the history of great women. Marie Curie discovered radium and revolutionised medical science. Empress Cixi transformed China. Frida Kahlo turned an unflinching eye on life and death. Anna Politkovskaya dared to speak truth to power, no matter the cost. Their names should be shouted from the rooftops. And that is exactly what Jenni Murray is here to do.
