This is an extraordinary book, unlike anything I have read before. It shouldn’t be surprising that a book called Perfume so successful immerses the reader in odour. This is a book that swoons and a book that stinks. It is a book that you must read if you are a writer, as a reminder that every sense can be used enslave a reader.

Perfume: The Story of a Murderer: Patrick Suskind, John E ...

The word perfume derives from the Latin *perfumare*, meaning "to smoke through". Perfumery, as the art of making perfumes, began in ancient Mesopotamia, Egypt, the Indus Valley Civilization and possibly Ancient China.It was further refined by the Romans and the Arabs.. The world's first-recorded chemist is considered to be a woman named Tapputi, a perfume maker mentioned in a cuneiform tablet ...

Perfume - Wikipedia

When we smell a particular fragrance, such as, say, clean laundry or a fresh peach, we instantly and unconsciously connect that smell to a portion of our memory. Smell can evoke feelings and bring back memories that we forgot we had. Perfume is, quite simply, a mastery of some of the most frequent scents, and the artful combination thereof to produce a unique smell for an individual person.

Perfume - The Art of Making Perfumes

An artisan perfumer reveals a lost art and its mysterious, sensual history. For centuries, people have taken what seems to be an instinctive pleasure in rubbing scents into their skin. Perfume has helped them to pray, to heal, and to make love. And as long as there has been perfume, there have been perfumers, or rather the priests, shamans, and apothecaries who were their predecessors. Yet, in many ways, perfumery is a lost art, its creative and sensual possibilities eclipsed by the synthetic ingredients of which contemporary perfumes are composed, which have none of the subtlety and complexity of essences derived from natural substances, nor their lush histories. Essence and Alchemy resurrects the social and metaphysical legacy that is entwined with the evolution of perfumery, from the dramas of the spice trade to the quests of the alchemists to whom today's perfumers owe a philosophical as well as a practical debt. Mandy Aftel tracks scent through the boudoir and the bath and into the sanctums of worship, offering insights on the relationship of scent to sex, solitude, and the soul. Along the way, she imparts instruction in the art of perfume compositions, complete with recipes, guiding the reader in a process of transformation of materials that continues to follow the alchemical dictum solve et coagula (dissolve and combine) and is itself aesthetically and spiritually transforming.

Winner of the 2016 Perfumed Plume Award The “Alice Waters of American natural perfume” (indieperfume.com) and author of the Art of Flavor celebrates our most potent sense, through five rock stars of the fragrant world Mandy Aftel is widely acclaimed as a trailblazer in natural perfumery. Over two decades of sourcing the finest aromatic ingredients from all over the world and creating artisanal fragrances, she has been an evangelist for the transformative power of scent. In Fragrant, through five major players in the epic of aroma, she explores the profound connection between our sense of smell and the appetites that move us, give us pleasure, make us fully alive. Cinnamon, queen of the Spice Route, touches our hunger for the unknown, the exotic, the luxurious. Mint, homegrown the world over, speaks to our affinity for the familiar, the native, the authentic. Frankincense, an ancient incense ingredient, taps into our longing for transcendence, while ambergris embodies our unquenchable curiosity. And exquisite jasmine exemplifies our yearning for beauty, both evanescent and enduring. In addition to providing a riveting initiation into the history, natural history, and philosophy of scent, Fragrant imparts the essentials of scent literacy and includes recipes for easy-to-make fragrances and edible, drinkable, and other useful concoctions that reveal the imaginative possibilities of creating with—and reveling in—aroma. Vintage line drawings make for a volume that will be a treasured gift as well as a great read.

Create Custom Perfumes the Natural Way This unprecedented, comprehensive guide from renowned perfumer Anya McCoy is an inspiring resource for anyone interested in creating artisanal perfume at home. Discover simple step-by-step methods for making perfume without harsh chemicals. Jump right in, using local plants and common household ingredients. Soon you’ll be building your own scent collection and creating unforgettable gifts for friends and family. This book covers a variety of techniques for capturing fragrances from natural materials, making it easy to choose the project that works for your schedule and experience level. Source your own organically grown botanicals, and enjoy the earth-friendly benefits of creating your own essential oils and extractions sustainably. Make your own all-natural perfumes, room and linen sprays, body butters, massage oils, and more. Explore the nuances of scent blending to create delightful fragrances that are unique to you. Packed with easy methods and expert guidance, this book will become an indispensable reference as you grow into a confident scent designer.

Master your own custom perfume blends with ingredients to benefit your mind, body, and emotions in All-Natural Perfume Making. Just like magic, turn botanical herbs, flowers, and essential oils into wonderful-smelling, healthy, and sustainable perfumes. In All-Natural Perfume Making, author and herbalist Kristen Schuhmann guides beginning perfumers in the art and techniques of crafting oil-based, alcohol-based, and solid perfumes. Learn the history and traditional benefits of certain scents as you create your own unique blends from a variety of plant-based ingredients. In addition to smelling good,natural scents can be a powerful self-care tool to benefit mental and emotional health. Feeling anxious? A blend of vanilla, lavender, cedarwood, and neroli can help relax frazzled nerves. Have a big test coming up? Boost your brain power with rosemary, sweet orange, and peppermint. Once you've grasped the techniques in All-Natural Perfume Making, the possibilities are endless as you mix, layer, and experiment with natural scents. Perfect for the beginner who wants to create their own signature scents without the use of harsh chemicals, this book provides a solid base on the philosophy and methods of crafting all-natural fragrances that not only smell fantastic but can add to your well-being.

AQA Approved Help students to apply and develop their knowledge, progressing from basic concepts to more complicated Chemistry, with worked examples, practical activities and mathematical support throughout. - Provides support for all 12 required practicals with activities that introduce practical work and other experimental investigations in Chemistry - Offers detailed examples to help students get to grips with difficult concepts such as Physical Chemistry calculations - Mathematical skills are integrated throughout the book and all summarised in one chapter for easy reference - Allows you to easily measure progression with Differentiated End of Topic questions and Test Yourself Questions - Develops understanding with free online access to Test yourself Answers, an Extended Glossary, Learning Outcomes and Topic Summaries

Develop and assess your students' knowledge and mathematical skills throughout A Level with worked examples, practical assessment guidance and differentiated end of topic questions with this Edexcel Year 2 student book. - Identifies the level of your students' understanding with diagnostic questions and a summary of prior knowledge at the start of the Year 1 Student Book. - Provides support for all 16 required practicals with various activities and questions, along with a 'Practical' chapter covering procedural understanding and key ideas related to measurement - Mathematical skills are integrated throughout with plenty of worked examples, including notes on methods to help explain the strategies for solving each type of problem - Offers plenty of practice with Test Yourself Questions to help students assess their understanding and measure progress - Encourages further reading and study with short passages of extension material - Develops understanding with free online access to Test yourself Answers, an Extended Glossary, Learning Outcomes and Topic Summaries

An odorless baby found orphaned in a Paris gutter in 1738 grows to become a monster obsessed with his perfect sense of smell and a desire to capture, by any means, the ultimate scent that will make him human. Reader's Guide available. Reprint. 20,000 first printing.

Many studies have been carried out on fragrances, flavors and perfumes worldwide. These products have important commercial value not only in India but in all over the world. Perhaps the most interesting results of the last few years in the fragrance and flavour fields are the many compounds described in this book. They may be used to engender or augment flavours in foodstuffs, chewing gums and medicinal products like mouthwash and toothpaste. The same compounds or closely related ones serve also to produce desirable aromas for perfumes, perfumed compositions such as soaps, detergents and cosmetics etc. Perfume is a mixture of fragrant essential oils and/or aroma compounds, fixatives, and solvents used to give the human body, animals, objects, and living spaces a pleasant scent. The odoriferous compounds that make up a perfume can be manufactured synthetically or extracted from plant or animal sources. Perfumes have been known to exist in some of the earliest human civilizations either through ancient texts or from archaeological digs. Modern perfumery began in the late 19th century with the commercial synthesis of aroma compounds, which allowed for the composition of perfumes with smells previously unattainable solely from natural aromatics alone. Flavors and Fragrances (F&F) are the essential ingredients that lend taste and smell, respectively, to food and personal or home care products. Without these, all the products that we use such as toffees, chips, toothpastes, soaps and shampoos, would be tasteless or odorless, boring, functional products. Fragrances are different types; floral, fruity, woody, flower, natural, etc. and has applications in different field; soap and toiletries, cosmetics, household applications etc. Flavoring in common language denote the combined chemical sensations of taste and smell, the same terms are usually used in the fragrance and flavors industry to refer to edible chemicals and extracts that alter the flavor of food and food products through the sense of smell. Applications of flavouring are in numerous field; meat, chocolate, dairy, beverage, confectionary, bakery, teas etc. Due to the high cost or unavailability of natural flavor extracts, most commercial flavorants are nature identical, which means that they are the chemical equivalent of natural flavors but chemically synthesized rather than being extracted from the source materials. Traditionally, while flavors and fragrances were viewed as the most customized of all raw materials, and therefore commanded higher prices, in the last decade, prices have been pushed down consistently by large manufacturers. This book basically deals with the roots and the evolution of perfumery, the part of hedonism, how perfumery is linked to the other fine arts, the art of composition, conclusion, introduction, fragancing of functional products, line extensions, perfumery for product blossoms products, floral series : rose notes, jasmín notes, hyacinth notes, lilac and lily, orange blossom notes, tuberose notes, violet notes, mignonette, woody series: sandal notes, peppery notes, caryophyllaceous notes, introduction, aroma composition of various teas, fragrance ceylon black tea, keemun black tea, green tea, pouchong tea and jasmine tea, lotus tea, soap manufacture, raw materials ,shaving soap, transparent soaps, super fatted toilet soaps, the milling process, coloured soaps, perfumes, soap compounds, accacia, almond, almond soap, amber soap, buttermilk, brown Windsor, carnation, chypre, cologne, cyclamen, fougere, heliotrope, hyacinth, jasmín, lavender, lilac, lily, etc. This book contains formulae and processes of various types of flavours, fragrances and perfumes. New entrepreneurs, technocrats, research scholars can get good knowledge from this book.

With a ton of recipes and helpful hints on perfume making, you'll discover how to make homemade perfumes, body sprays, aftershave colognes, floral waters and much more using pure essential oils. Rebecca shares with you insider secrets from the beauty industry on how to develop your very own signature fragrance.
