Early criminologists believed primarily believed that crime was a ' class ' problem, an issue that was confined for the most part to lower socio-economic strata (Lynch 1996, pp. 4, 8-9). This view point is still widely held and, as regression

Vold's Theoretical Criminology, first published in 1958, was the first book of its kind and is considered "the" standard text in criminological theory. "Vold" is a household name among criminologists because of this book,

which many of them used as students and continue to use as professors. Each theory is presented accurately and comprehensively within its historical context. Relevant empirical research is reviewed and assessed, and research issues related to theory

Many textbooks provide summaries and critiques of criminological theories, which are often supported by empirical evidence. However, this
